1. Precautions

1-1 Precautions for the Service

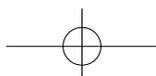

- **Use the standard parts when replacing the electric parts.**
 - Confirm the model name, rated voltage, rated current of the electric parts.
- **Repair the disconnection of HARNESS securely when repairing the break down.**
 - If there is any connection error, it causes an abnormal noise and incorrect operation.
- **In case that you assemble or disassemble the products with laying it on the side, do work on the work cloth.**
 - If not, the exterior of products can be scratched.
- **Remove dust and foreign materials from harness, connection part, and inspection part thoroughly when repairing the break down.**
 - It protects the danger of fire such as tracking and short.
- **Tighten tightly the service valve of outdoor unit and the cap of charging valve with a monkey spanner.**
- **Check the assembly status of parts after repairing the break down.**
 - It should be same as the status before repairing.

1-2 Precautions for the Static Electricity and PL

- **As the PCB power terminal has a weakness for the static electricity, pay attention to it during the repair and measurement.**
 - Work with insulation gloves during the repair and measurement of PCB.
- **Check the distance between the product and the other electronic appliances such as TV, video, and audio. It should be over 2m.**
 - If not, it causes a bad picture quality or a noise.
- **Repairing the products by consumer should be strictly prohibited.**
 - There is a danger of electric shock or fire due to incorrect disassembly.

1-3 Precautions for the Safety

- **Do not pull any electric wires and do not touch an auxiliary power switch with a wet hand.**
 - There is a danger of electric shock or fire.
- **In case any wire or power plug has been damaged, replace it to eliminate any possible danger.**
- **Do not bend the power cord by force and do not put any heavy object on the power cord.**
 - There is a danger of electric shock or fire.
- **Do not use multi socket.**
 - There is a danger of electric shock or fire.
- **Ground the product if necessary.**
 - Be sure to ground the product if there is any danger of electric leakage due to water or moisture.
- **Be sure to turn off the auxiliary power switch or pull out the power plug during replacement or repair of electric parts.**
 - There is a danger of electric shock.
- **In case the product will not be in use for a long time, the battery of remote control should be kept separately.**
 - Leakage of inside fluid can cause break down of remote control.

2. Product Specifications

2-1 The Feature of Product

2-1-1 Features

■ What is a 1 Way Cassette type Air Conditioner?

Stylish design and pleasant heating and cooling enhances the elegance of the space.

With a compact design that occupies the least space possible, it saves space for installation and its air-flow method from the ceiling allows pleasant air to fill every corner of the space.

■ Clean heating and cooling system

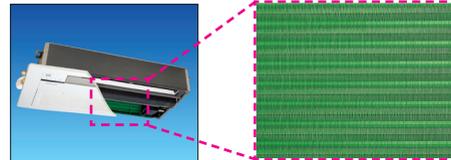

• Long-life filter

A filter that obviates the need for replacement and/or maintenance up to 1,000~2,000 hours and retains its initial cleanness.

• Anti-bacterial cooler/ anti-bacterial filter

Employing the unique and independent technology of Samsung, it uses an anti-bacterial cooler. No bacteria and fungus can propagate here.

Anti-bacterial cooler is registered for domestic, American, Japanese, Italian patents.
(patent number: Korea P-0182555/ Italy: 1294250 the US: 5947194/ Japan 3048541)

• Water-washable grille

To allow easy cleaning, it has a removable grille for washing thoroughly with water after dismounting.

• Filter cleaning notice function

There is a filter cleaning instruction notice on the main body of the indoor unit and a wired remote controller. It lets you know when to clean the filter.

Filter cleaning notice function can be adjusted between 1,000 and 2,000 hours to give notice depending on the condition in which it is used.

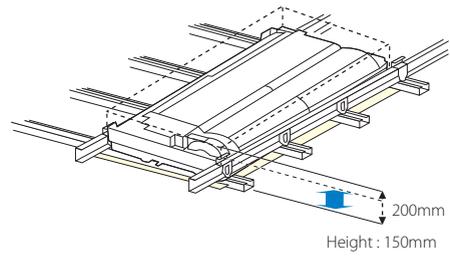

■ Convenient installation

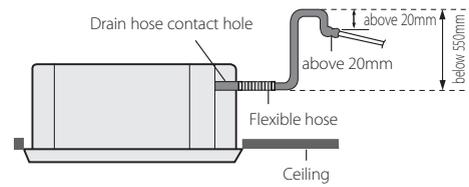

- **Compact design**

Compact design that occupies a small space can be easily installed in a limited ceiling area.

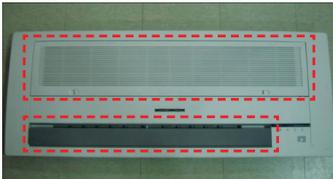

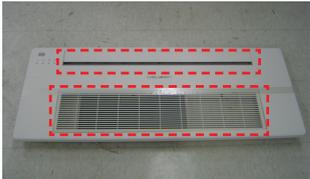

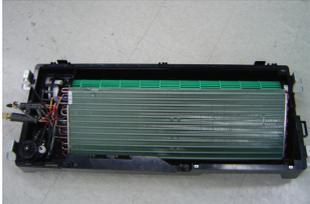

- **High head drainage pump**

Drainage pump can drain up to 550mm higher than the drainage port, so it is easy to install drain piping.

2-1-2 Changes in comparison to basic model

Changed part	Changed item and feature	Basic	After changed
Indoor Unit	Panel Front - Changes in the shape of blade and grille		
	Ass'y Control In - Integration of terminal part and PCB part		
	Ass'y Evap Unit - Changed from 2 rows and 14 levels to 2 rows 12 levels		

2-1-3 Newly adopted features

Applied part	Newly adopted item and feature	Item
Indoor Unit	Ass'y Cabinet In - Injection part applied	

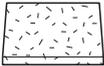

2-2 The Comparative Specifications of Product

Item				Development Model		Comparative Model
				SH026EAV Series	SH035EAV Series	KH035EAV
Design	Indoor Unit					
	Outdoor Unit					
	Remote Control					
Power specifications				Single phase, 220~240V, 50Hz		Single phase, 220~240V, 50Hz

■ Necessary Tools

Item	Remark
+SCREW DRIVER	
MONKEY SPANNER	

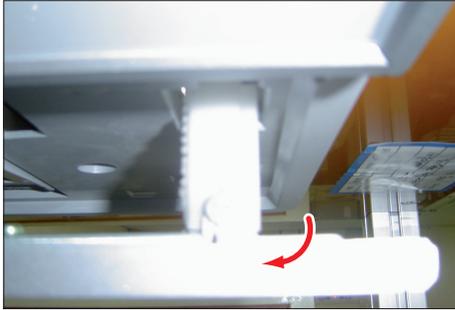

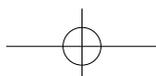

3-1 Indoor Unit

No	Parts	Procedure	Remark
1	Panel & Filter(A type)	<p>1) Press the push button on the Grille to open.</p> <p>2) Separate 1 clip from the Panel then tilt the Grille 45° to remove Grille from the Panel.</p> <p>3) Separate Filter from the Panel.</p> <p>4) Separate 3 cover screws from it.</p> <p>5) Undo 6 fixed screws on the Panel to remove from the Indoor Unit. (Use +Screw Driver.)</p>	    

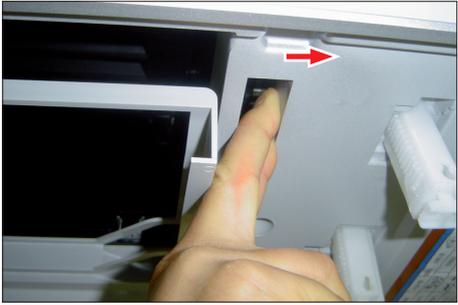

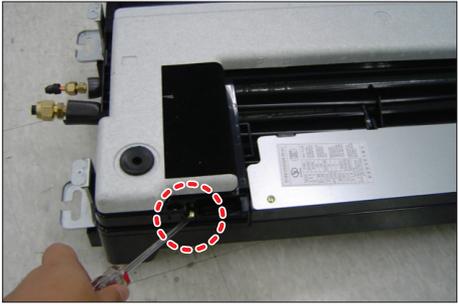

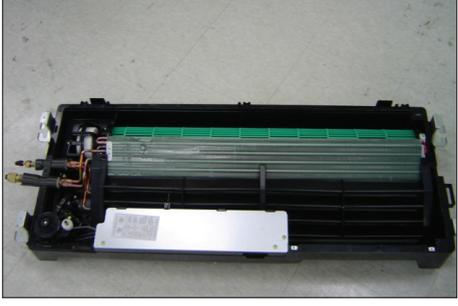

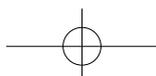

No	Parts	Procedure	Remark
		6) Press the left and right hooks on the Panel to separate Panel from the Indoor Unit.	
	Panel & Filter (B type)	<p>1) Press the [Filter Reset] button on the Wireless Remote Controller once. It will make an induction Panel that is shown in the next picture slide down.</p> <p>2) Spin the 2 connecting levers that link both ends of the induction Panel and gear as shown in the next picture.</p> <p>3) Push the induction Panel forward to remove it.</p>	   

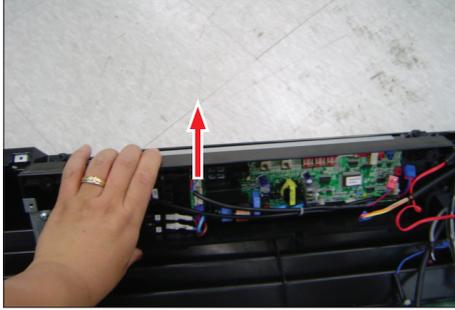

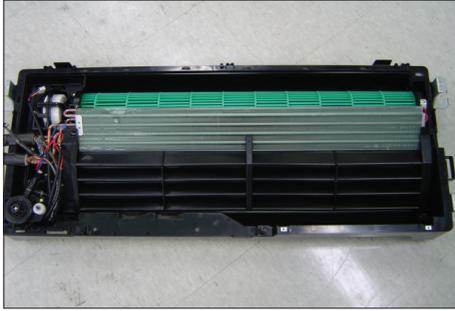

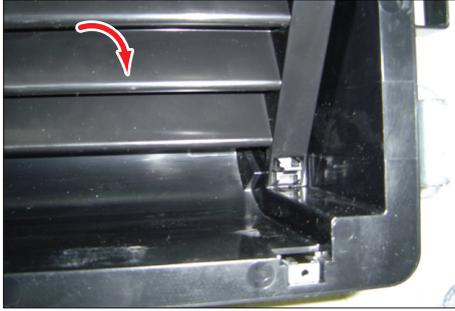

No	Parts	Procedure	Remark
		4) Remove the induction Filter. (2EA)	
		5) Remove the Filter Guide. (2EA)	
		6) Remove the 3 screws covers.	
		7) Remove 4 connecting wires for the Panel and undo the 7 screws that fix the Panel. (Use + Screw Driver.)	
		8) After pulling out 2 Panel fixing hooks, please separate the Panel and the Indoor Unit.	

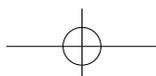

No	Parts	Procedure	Remark
			
2	Drain Pan	<p>1) Separate 5 fixing screws in the Drain Pan. (Use +Screw Driver.)</p> <p>2) Pull the Drain Pan to separate it from the Indoor Unit.</p> <p>▲ When separating the Pan please be careful not to touch the board of Heat Exchanger.</p>	 
3	Control In	<p>1) Undo 3 fixing screws in the Control In appliance part to separate the Cover. (Use +Screw Driver.)</p>	 

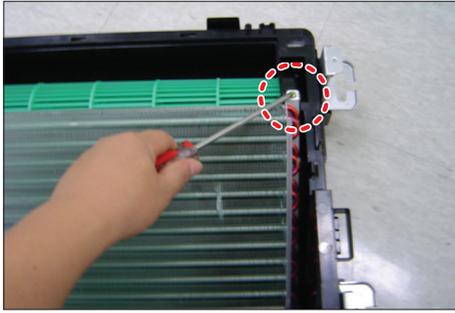

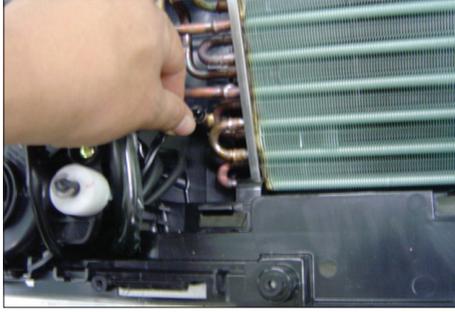

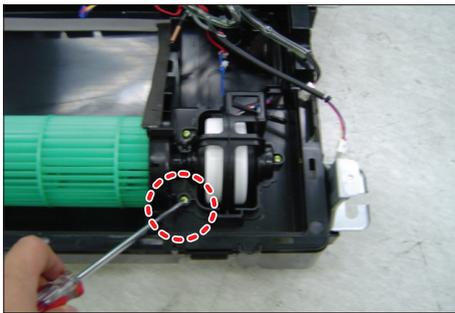

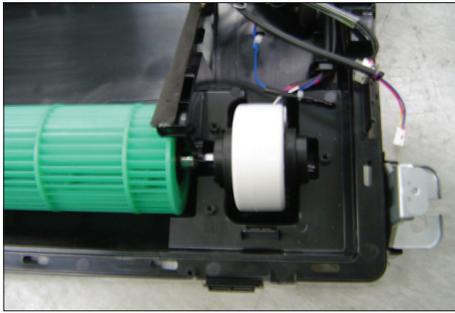

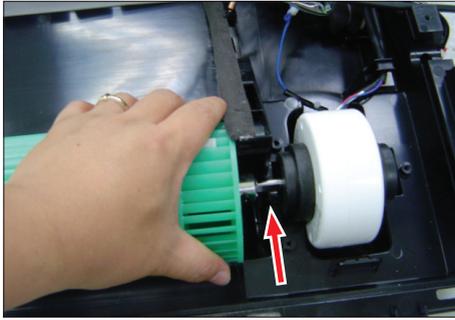

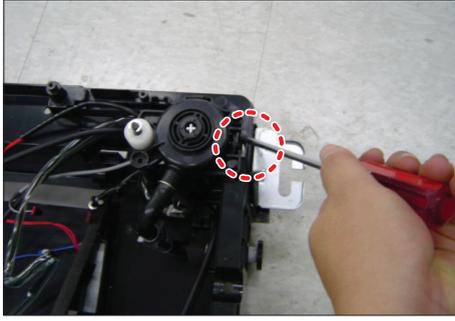

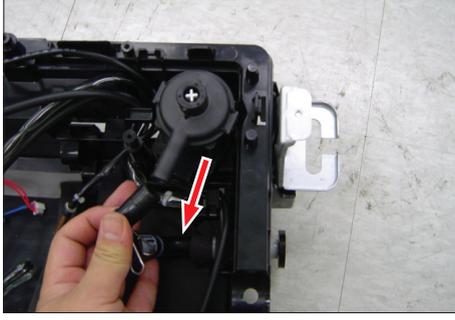

No	Parts	Procedure	Remark
		<p>2) Separate 8 connectors on the PCB of the Indoor Unit.</p> <p>3) Separate the Control In from the Indoor Unit.</p>	  
4	Drain Sub	1) Push the hook on the Drain Sub to separate it.	 

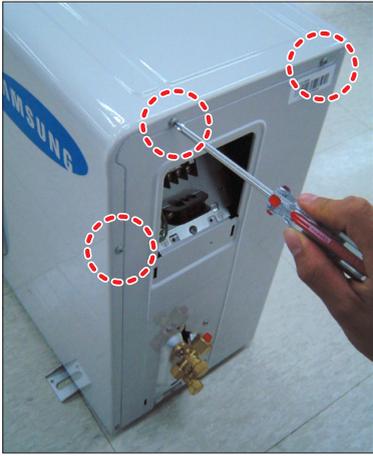

No	Parts	Procedure	Remark
5	Heat Exchanger	<ol style="list-style-type: none"> 1) Undo fixing screw in the Heat Exchanger. (Use +Screw Driver.) 2) Separate the Indoor Unit's Sensor from the Heat Exchanger. 3) Separate the Heat Exchanger from the Indoor Unit. 	  
6	Cross Fan	<ol style="list-style-type: none"> 1) Undo 3 fixing screws on the Cover Fan Motor. (Use +Screw Driver.) 2) Separate the Cover Fan Motor from the Indoor Unit. (Use +Screw Driver.) 	 

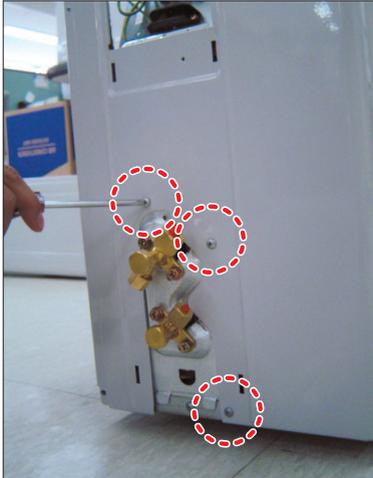

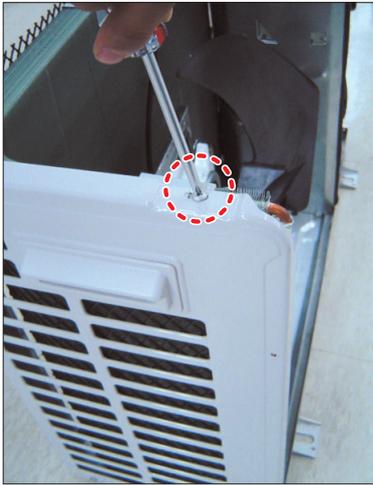

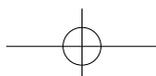

No	Parts	Procedure	Remark
		3) Separate the Cross Fan from the Indoor Unit.	
7	Drain Pump	<p>1) Separate fixing screw in the Cover Drain Pump. (Use +Screw Driver.)</p> <p>2) Separate the Drain Hose from the Drain Pump.</p> <p>3) Separate the Drain Pump from the Indoor Unit.</p>	  

3-2 Outdoor Unit

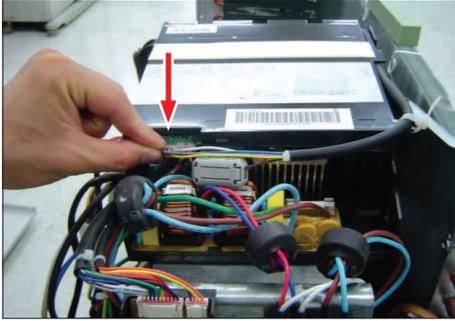

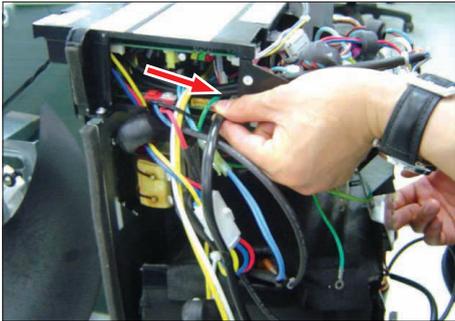

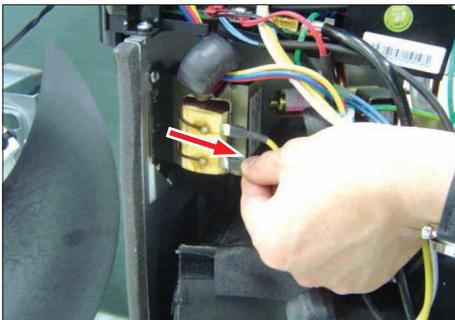

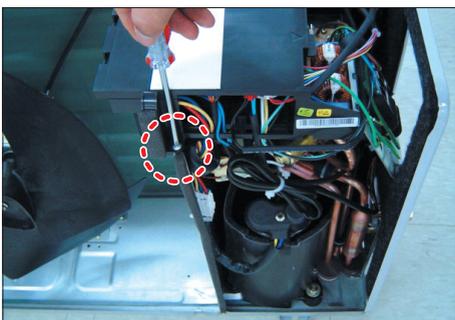

No	Parts	Procedure	Remark
1	Common Work	<p>⚠ Before disassembly, please make sure to shut off the power.</p> <p>1) Separate fixing screw in the Cover Side. (Use +Screw Driver.)</p> <p>2) Undo the 4 fixing screws on the left and right cabinet Side Edges then undo the screws on the lower front to separate the Cabinet Front. (Use +Screw Driver.)</p> <p>3) Separate the Cabinet Front as shown on the right picture.</p> <p>4) Undo fixing screw to remove Plate Control Out on the Cabinet Side RH. (Use +Screw Driver.)</p>	   

No	Parts	Procedure	Remark
		<p>5) Undo 2 fixing screws on the backside of the Cabinet Side RH. (Use +Screw Driver.)</p> <p>6) Undo 3 fixing screws to assemble Bracket Valve on the Cabinet Side RH. (Use +Screw Driver.)</p> <p>7) Undo 2 fixing screws on the Cabinet Side LF. (Use +Screw Driver.)</p>	  

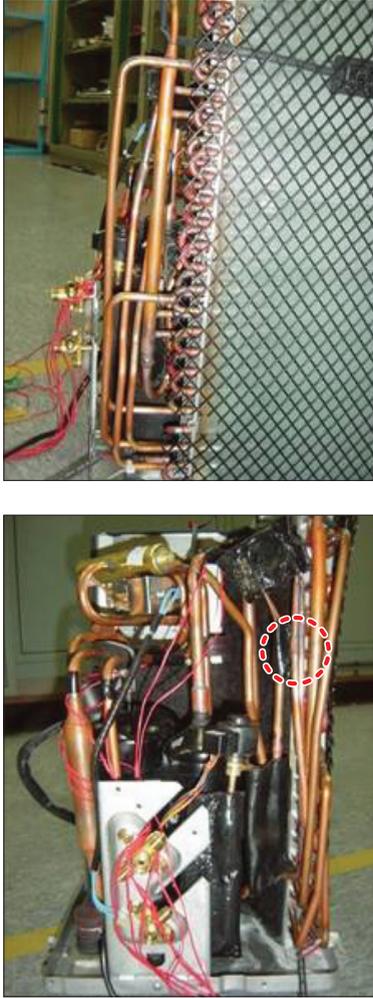

No	Parts	Procedure	Remark
2	Ass'y Control Out	<ol style="list-style-type: none"> 1) Separate the Motor wire from the PCB of the Ass'y Control Out. 2) Separate several Connectors from the PCB of the Ass'y Control Out. 3) Separate 2 Connect Wires from the Reactor. 4) Undo a fixing screw to assemble the Ass'y Control Out on the Partition. (Use +Screw Driver.) 	   

No	Parts	Procedure	Remark
3	Fan & Motor	<ol style="list-style-type: none"> 1) Release refrigerant first. 2) Undo the fixing screw. (Use +Screw Driver.) 3) Separate the induction and outlet pipes with a Welding Torch. (Use Monkey Spanner.) 4) Separate the Fan and Motor. 	
4	Heat Exchanger	<ol style="list-style-type: none"> 1) Undo 2 fixing screws. (Use +Screw Driver.) 2) Separate the induction and outlet pipes with a Welding Torch. 3) Separate the Heat Exchanger. <p>⚠ Please wear gloves when working as there is a possibility of cutting your hand.</p>	
5	Ass'y Valve 4 way & Ass'y Valve EEV	<ol style="list-style-type: none"> 1) Undo 4 fixing bolts to assemble a Valve Service on the Bracket Valve as shown in the right picture. (Use Monkey Spanner.) <p>⚠ When separating Compressor, Heat Exchanger and pipes please ensure that Compressor is completely free from any remaining refrigerant then separate all pipes with welding torch.</p> <p>■ Ass'y Valve 4 Way</p> <ol style="list-style-type: none"> 1) Separate 3 welded parts. 	 

No	Parts	Procedure	Remark
		<p>■ Ass'y Valve EEV</p> <p>1) Separate 1 welded parts.</p>	
6	Compressor	<ol style="list-style-type: none"> 1) Undo nuts on the Terminal Cover. 2) Separate the Terminal Cover and then Connect Wires from the Compressor. 3) Separate the Felt Comp Sound. 4) Undo 3 bolts on the flow of the Compressor as shown in the right-hand picture. (Use Monkey Spanner.) 	

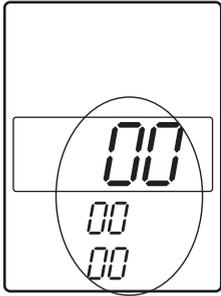

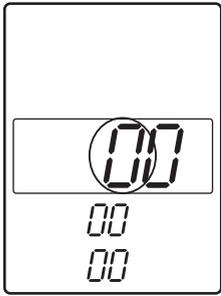

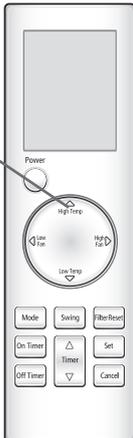

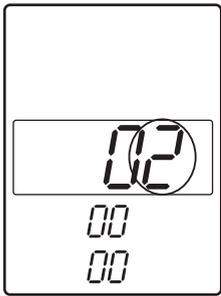

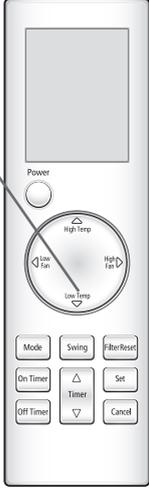

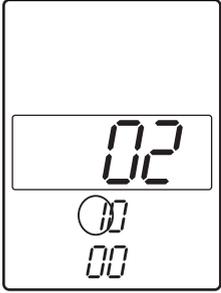

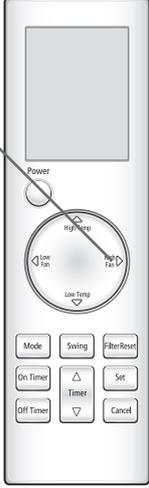

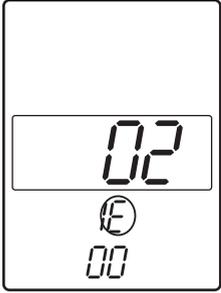

4. Troubleshooting

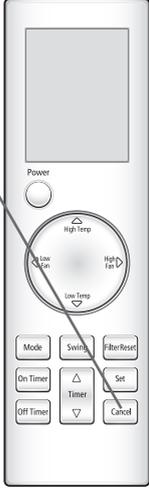

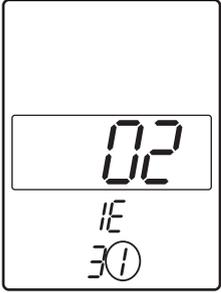

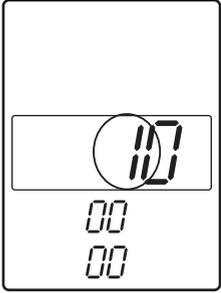

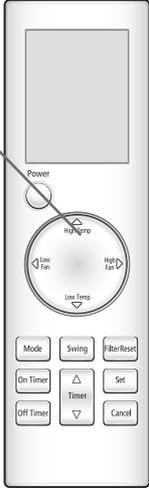

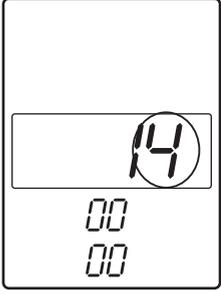

4-1 Setting Option Setup Method

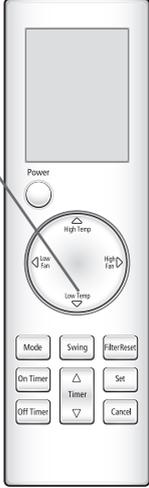

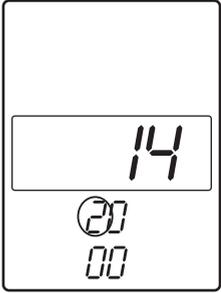

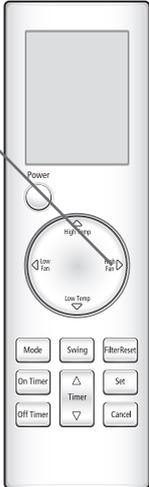

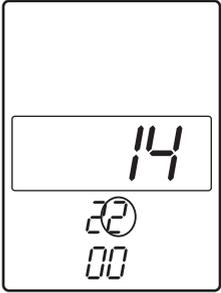

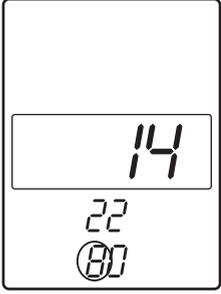

4-1-1 PCB option code input method(example : 021E31-142285-2A3114-39421F)

Be sure to input the option code suitable for the indoor unit by use of wireless remote controller after replacing the PCB of indoor unit. Follow to do the following 27 steps sequentially.

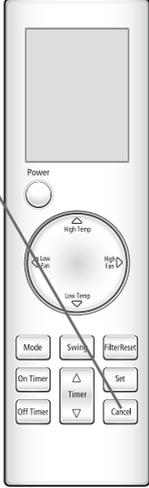

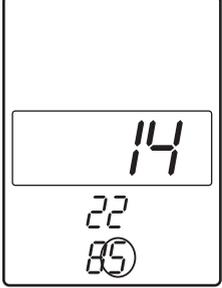

Operation method	Applicable button	Indicating state
<p>* Step 1</p> <p><u>Method</u></p> <ol style="list-style-type: none"> ① Remove the battery of remote controller. ② Push the Off Timer and Cancel button simultaneously. ③ Insert the battery. <p><u>Result</u></p> <p>When the display of remote controller is indicated as shown in the right, then go to the step 2.</p>		
<p>* Step 2</p> <p><u>Method</u></p> <p>If the first digit of remote controller shows "0", go to the step 3.</p> <ul style="list-style-type: none"> • If it shows 1, press the Mode button one time to change it into 0 and then go to step 3. 		
<p>* Step 3</p> <p><u>Method</u></p> <p>Input the second digit of option code by pressing the High Temp button. example) 0<u>2</u>1E311422852A311439421F</p> <p><u>Result</u></p> <p>If 2 is displayed, go to the step 4 (whenever pressing the button, 1~9, A,B,C,D,E,F are lit in order.)</p>		

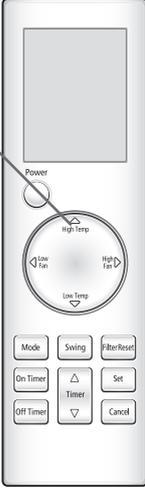

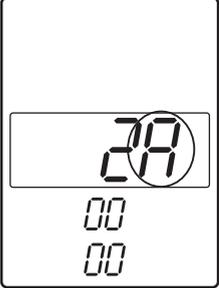

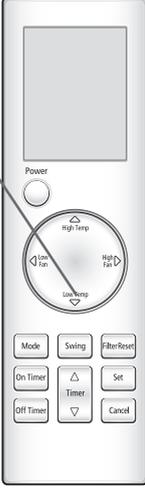

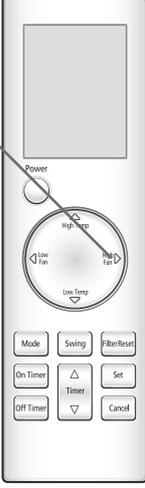

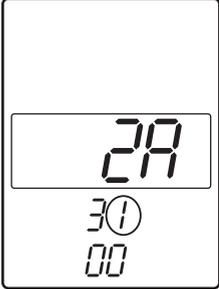

Operation method	Applicable button	Indicating state
<p>* Step 4</p> <p><u>Method)</u> Input the third digit of option code by pressing the Low Temp button. example) 021E311422852A311439421F</p> <p><u>Result)</u> If 1 is displayed, go to the step 5.</p>	 <p>The image shows the control panel with the 'Low Temp' button highlighted by a line pointing to the '1' in the example code.</p>	 <p>The digital display shows '02' in the top line and '00' in the bottom line.</p>
<p>* Step 5</p> <p><u>Method)</u> Input the fourth digit of option code by pressing the High Fan button. example) 021E311422852A311439421F</p> <p><u>Result)</u> If E displays, go to step 6.</p>	 <p>The image shows the control panel with the 'High Fan' button highlighted by a line pointing to the 'E' in the example code.</p>	 <p>The digital display shows '02' in the top line and 'E' in the bottom line.</p>
<p>* Step 6</p> <p><u>Method)</u> Input the fifth digit of option code by pressing the On Timer button. example) 021E311422852A311439421F</p> <p><u>Result)</u> If 3 displays, go to step 7.</p>	 <p>The image shows the control panel with the 'On Timer' button highlighted by a line pointing to the '3' in the example code.</p>	 <p>The digital display shows '02' in the top line, 'IE' in the middle line, and '30' in the bottom line. Below the display, the text 'SEG5' is written.</p>

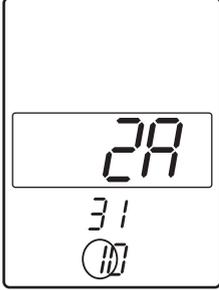

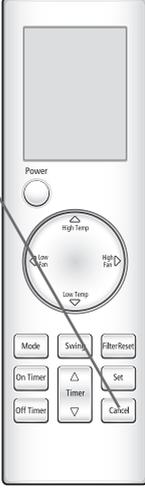

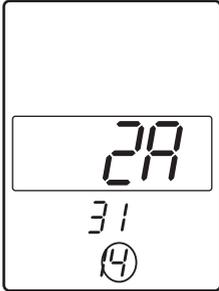

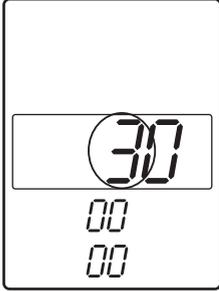

Operation method	Applicable button	Indicating state
<p>* Step 7</p> <p><u>Method)</u> Input the sixth digit by pressing the Cancel button. example) 021E3<u>1</u>1422852A311439421F</p> <p><u>Result)</u> If 1 displays, go to step 8.</p>		
<p>* Step 8</p> <p><u>Method)</u> After completion up to step 7, pressing Mode button.</p> <p>① 1~7 steps are saved internally. ② If the first number is 1 at the time, it is correct. So go to step 9. • If wanting to see the screen of 2~7 steps, press the mode button repeatedly to make the first digit 0.</p>		
<p>* Step 9</p> <p><u>Method)</u> Input the eighth digit by pressing the High Temp button. example) 021E311<u>4</u>22852A311439421F</p> <p><u>Result)</u> If 4 displays, go to step 10.</p>		

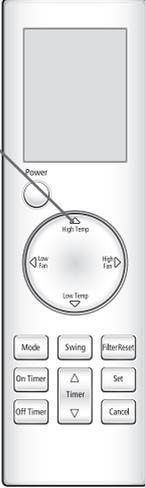

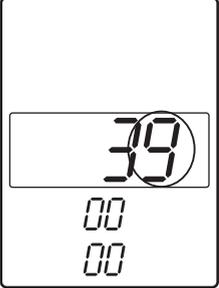

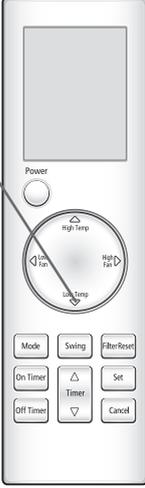

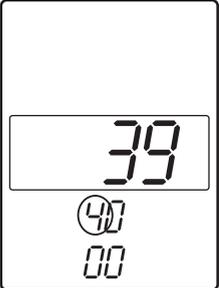

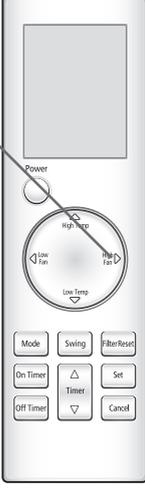

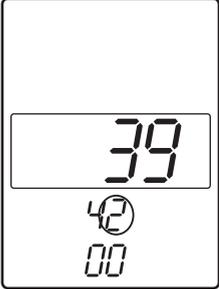

Operation method	Applicable button	Indicating state
<p>* Step 10 <u>Method)</u> Input the ninth digit by pressing the Low Temp button. example) 021E3114<u>2</u>2852A311439421F</p> <p><u>Result)</u> If 2 displays, go to step 11.</p>		
<p>* Step 11 <u>Method)</u> Input the tenth digit by pressing the High Fan button. example) 021E31142<u>2</u>852A311439421F</p> <p><u>Result)</u> If 2 displays, go to step 12.</p>		
<p>* Step 12 <u>Method)</u> Input the 11st digit by pressing the On Timer button. example) 021E311422<u>8</u>52A311439421F</p> <p><u>Result)</u> If 8 displays, go to step 13.</p>		

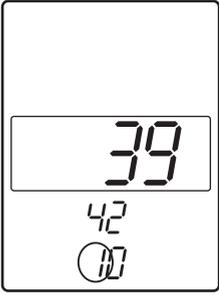

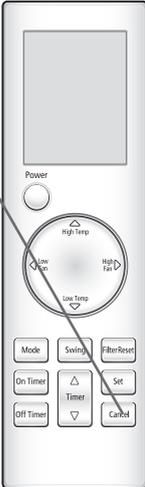

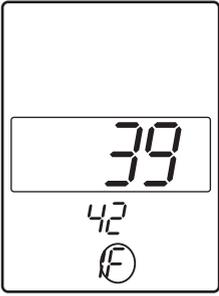

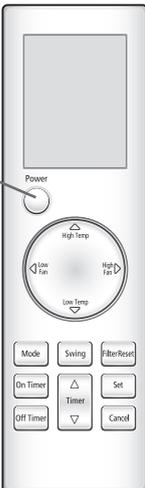

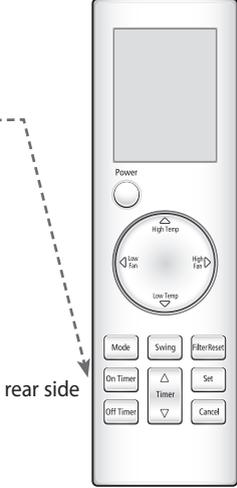

Operation method	Applicable button	Indicating state
<p>* Step 13</p> <p><u>Method)</u> Input the 12th digit by pressing the Cancel button. example) 021E311422852A311439421F</p> <p><u>Result)</u> If 5 displays, go to step 14.</p>		
<p>Step 14</p> <p><u>Method)</u> After completion up to step 13, pressing Mode button.</p> <ul style="list-style-type: none"> ① Previous steps are saved internally. ② If the first number is 2 at the time, it is correct. So go to step 15. • If wanting to see previous screen, press the mode button repeatedly to make the first digit to with digit. 		<p>■ Error</p> <ul style="list-style-type: none"> ① If the On/Off, Timer and Fan indicator is flickering, the wrong option code is input. Put off the power of indoor unit and turn it on again and then input the option code again. If the same error occurs, it is the EEPROM is defective or not inserted. Replace the PCB. ② If all of On/Off, Timer, Fan and Filter Sign indicator are flickering along with the "Tiring" sound, there is option code already input which are different from the current ones. Check the option code and press the button again if correct. Option code will be input.(Check the option code correctly. At the time, if the same error continues to occur, the option code is out of input range. Check the option code again and repeat the step 1~14.

Operation method	Applicable button	Indicating state
<p>* Step 15 <u>Method)</u> Input the 14th digit by pressing the High Temp button. example) 021E311422852A311439421F</p> <p><u>Result)</u> If A displays, go to step 16.</p>	 <p>The diagram shows the control panel with a line pointing to the 'High Temp' button on the circular fan speed dial.</p>	 <p>The LCD display shows '2A' in the top line, '00' in the middle line, and '00' in the bottom line.</p>
<p>* Step 16 <u>Method)</u> Input the 15th digit by pressing the Low Temp button. example) 021E311422852A311439421F</p> <p><u>Result)</u> If 3 displays, go to step 17.</p>	 <p>The diagram shows the control panel with a line pointing to the 'Low Temp' button on the circular fan speed dial.</p>	 <p>The LCD display shows '2A' in the top line, '30' in the middle line, and '00' in the bottom line.</p>
<p>* Step 17 <u>Method)</u> Input the 16th digit by pressing the High Fan button. example) 021E311422852A311439421F</p> <p><u>Result)</u> If 1 displays, go to step 18.</p>	 <p>The diagram shows the control panel with a line pointing to the 'High Fan' button on the circular fan speed dial.</p>	 <p>The LCD display shows '2A' in the top line, '30' in the middle line, and '00' in the bottom line.</p>

Operation method	Applicable button	Indicating state
<p>* Step 18 <u>Method)</u> Input the 17th digit by pressing the On Timer button.  example) 021E311422852A311439421F</p> <p><u>Result)</u> If 1 displays, go to step 19.</p>		
<p>* Step 19 <u>Method)</u> Input the 18th digit by pressing the Cancel button. example) 021E311422852A311439421F</p> <p><u>Result)</u> If 4 displays, go to step 20.</p>		
<p>* Step 20 <u>Method)</u> After completion up to step 20, pressing Mode button. ① Previous steps are saved internally. ② If the first number is 3 of the time, it is correct. so go to step 22. • If wanting to see previous screen, press the mode button repeatedly to make the first digit to with digit.</p>		

Operation method	Applicable button	Indicating state
<p>* Step 21 <u>Method)</u> Input the 20th digit by pressing the High Temp button. example) 021E311422852A311439<u>4</u>21F</p> <p><u>Result)</u> If 9 displays, go to step 22.</p>		
<p>* Step 22 <u>Method)</u> Input the 21th digit by pressing the Low Temp button. example) 021E311422852A311439<u>4</u>21F</p> <p><u>Result)</u> If 4 displays, go to step 23.</p>		
<p>* Step 23 <u>Method)</u> Input the 22th digit by pressing the High Fan button. example) 021E311422852A3114394<u>2</u>1F</p> <p><u>Result)</u> If 2 displays, go to step 24.</p>		

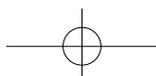

Operation method	Applicable button	Indicating state
<p>* Step 24 <u>Method)</u> Input the 23th digit by pressing the On Timer button.  example) 021E311422852A311439421F</p> <p><u>Result)</u> If 1 displays, go to step 25.</p>		
<p>* Step 25 <u>Method)</u> Input the 24th digit by pressing the Cancel button.  example) 021E311422852A311439421F</p> <p><u>Result)</u> If F displays, go to step 26.</p>		
<p>* Step 26 <u>Method)</u> Turn the remote controller toward the indoor unit and press the Power button, and if the "Ting" or "Tirring" sounds, the input of option is completed. • If error displays, solve the problem with reference to the right side.</p>		<p>■ Error</p> <p>① If the On/Off, Timer and Fan indicator is flickering, the wrong option code is input. Put off the power of indoor unit and turn it on again and then input the option code again. If the same error occurs, it is the EEPROM is defective or not inserted. Replace the PCB.</p> <p>② If all of On/Off, Timer, Fan and Filter Sign indicator are flickering along with the "Tirring" sound, there is option code already input which are different from the current ones. Check the option code and press the button again if correct. Option code will be input.(Check the option code correctly. At the time, if the same error continues to occur, the option code is out of input range. Check the option code again and repeat the step 1~26.</p>

Operation method	Applicable button	Indicating state
<p>* Step 27 <u>Method)</u> If the steps 1 to 26 are completed, remove the battery and insert it again to return to the original display of remote controller. (Operation mode/SET TEMP. /fan speed displays.)</p>	 <p>rear side</p>	<p>■ Error</p> <p>① If the On/Off, Timer and Fan indicator is flickering, the wrong option code is input. Put off the power of indoor unit and turn it on again and then input the option code again. If the same error occurs, it is the EEPROM is defective or not inserted. Replace the PCB.</p> <p>② If all of On/Off, Timer, Fan and Filter Sign indicator are flickering along with the "Tiring" sound, there is option code already input which are different from the current ones. Check the option code and press the button again if correct. Option code will be input.(Check the option code correctly. At the time, if the same error continues to occur, the option code is out of input range. Check the option code again and repeat the step 1~26.</p>

4-1-2 Option Items

SEGMENT MODEL	SEG1	SEG2	SEG3	SEG4	SEG5	SEG6	SEG7	SEG8	SEG9	SEG10	SEG11	SEG12
SH026EAV1	0	7	8	7	7	5	1	3	8	0	F	8
SH035EAV1	0	7	7	7	7	5	1	5	8	2	4	d

4-2 Things to check before diagnosis

4-2-1 1 way cassette type

■ Error detection and reoperation

1. If an error occurs during operation, the LED flashes to indicate that there is a problem then all operations stop except LED.
2. When resuming operation with remote controller and switch, it determines error mode after normal operation.

■ LED lamp display when error is detected

Error LED lamp Display					Cause	Actions to take
						
Operation (Green)	Defrost (Red)					
X	X	●	X	X	<ul style="list-style-type: none"> • Breakaway from the room temperature sensor connector • Cut the room temperature sensor wire 	<ul style="list-style-type: none"> • Check the connection between the room temperature wire and the main PCB of the indoor unit • Check the pattern of the room temperature sensor part of the main PCB of the indoor unit and if parts are open or shorted

4-2-2 Outdoor Unit

Error mode	Content	Measures	Product operation status in case of error	Error type
			Outdoor unit compressor/ outdoor unit fan	
U01	Indoor unit communication error	Check the communication line for indoor units, check the power supply of the communication phase (DC)	Operation-off	Communication error
U02	Communication time-out error between indoor/outdoor unit 6-packet over error	Check the communication line for indoor units, check the power supply of the communication phase (DC)	Operation-off	Communication error
U21	Indoor temperature sensor (open/short error)	Check the temp. sensor of the indoor unit room. Check the indoor PCB connector CN21(white)	Operation-off	Indoor sensor error
U22	Indoor unit Eva In sensor (open/short)	Check the indoor unit drainage pipe sensor Check the indoor PCB connector CN21 (white)	Operation-off	Indoor sensor error
U28	Dismount of indoor unit Eva In sensor	Check the drainage pipe has been dismounted	Operation-off	Indoor sensor error
U53	Secondary detection of indoor floating switch	Check the indoor unit's float sensor Check the indoor PCB connector CN51 (black)	Operation-off	Self-diagnosis error
201	Indoor unit not connected	Check the indoor unit connection Check the indoor unit option	Operation-off	Communication error
203	Communication error between indoor/outdoor unit INV and Main Micom (1 min.)	Check the Main MICOM Check the inverter MICOM	-	Communication error
221	Outdoor temperature sensor error	Check the connection status of the sensor Check the sensor location Check the resistance values of sensor	Operation-off	Outdoor sensor error
237	Cond. temperature sensor error	Check the connection status of the sensor Check the sensor location Check the resistance values of sensor	Operation-off	Outdoor sensor error
251	[inverter] Emission temperature sensor error	Check the connection status of the sensor Check the sensor location Check the resistance values of sensor	Operation-off	Outdoor sensor error
416	Excessive temperature emission	Not an error (discharge temp. control)	-	Outdoor unit protection control error
425	Power cable connection error	Check the status of power connection	Operation-off	Outdoor sensor error

Outdoor Unit(cont.)

Error mode	Content	Measures	Product operation status in case of error	Error type
			Outdoor unit compressor/ outdoor unit fan	
450	Non-connection error of indoor and outdoor Communication wire (connected to the power terminal)	Check the status of power connection Check the connection status of the communication line	Operation-off	Self-diagnosis error
458	Outdoor fan 1 error	Check the input power connection status Check the connection status between the motor and PCB in outdoor unit Check the fuse of indoor/outdoor units	Operation-off	Self-diagnosis error
461	[inverter] Compressor operation error	Check the connection status of the compressor Check the resistance between different phases in compressor	Operation-off	Outdoor unit protection control error
462	Discharge current error/ PFC over-current error	Check the input power Check refrigerant is filled Check outdoor fan operates normally	Operation-off	Outdoor unit protection control error
464	[inverter] IPM over current error	Check refrigerant is filled Check the connection status of compressor and if it operates normally Check for any obstacles around indoor/outdoor units	Operation-off	Outdoor unit protection control error
467	[inverter] Compressor rotation error	Check the connection status of the compressor Check the resistance between different phases in compressor	Operation-off	Outdoor unit protection control error
468	[inverter] Current sensor error	Check PCB operates normally	Operation-off	Outdoor unit protection control error
469	[inverter] DC link voltage sensor error	Check the connection of input power Check the status of RY21 and R2000 of Inverter PCB	Operation-off	Outdoor unit protection control error
477	[inverter] OTP error	Check PCB operates normally	Operation-off	Outdoor unit protection control error
475	Outdoor fan 2 error	Check the connection status of input power Check the connection status of motor and outdoor PCB Check the fuse of indoor/outdoor unit	Operation-off	Self-diagnosis error
554	Gas leakage error	Check refrigerant is filled Check the indoor EVA sensor	Operation-off	Self-diagnosis error
556	Inconsistent volume	Check the indoor unit's option code	Operation-off	Outdoor unit protection control error

4-2-3 Wired remote controller

- If an error occurs  is displayed on the wired remote controller.
- To see an error code, please press the test button.

Error mode	Content	Measures	Product operation status in case of error	Error type
			Outdoor unit compressor/ outdoor unit fan	
101	Indoor unit communication error	Check the communication line for indoor units, check the power supply of the communication phase (DC)	Operation-off	Communication error
102	Communication time-out error between indoor/outdoor unit 6-packet over error	Check the communication line for indoor units, check the power supply of the communication phase (DC)	Operation-off	Communication error
121	Indoor temperature sensor (open/short error)	Check the temp. sensor of the indoor unit room. Check the indoor PCB connector CN21(white)	Operation-off	Indoor sensor error
122	Indoor unit Eva In sensor (open/short)	Check the indoor unit drainage pipe sensor Check the indoor PCB connector CN21 (white)	Operation-off	Indoor sensor error
128	Dismount of indoor unit Eva In sensor	Check the drainage pipe has been dismounted	Operation-off	Indoor sensor error
153	Secondary detection of indoor floating switch	Check the indoor unit's float sensor Check the indoor PCB connector CN51 (black)	Operation-off	Self-diagnosis error
201	Indoor unit not connected	Check the indoor unit connection Check the indoor unit option	Operation-off	Communication error
203	Communication error between indoor/outdoor unit INV and Main Micom (1 min.)	Check the Main MICOM Check the inverter MICOM	-	Communication error
221	Outdoor temperature sensor error	Check the connection status of the sensor Check the sensor location Check the resistance values of sensor	Operation-off	Outdoor sensor error
237	Cond. temperature sensor error	Check the connection status of the sensor Check the sensor location Check the resistance values of sensor	Operation-off	Outdoor sensor error
251	[inverter] Emission temperature sensor error	Check the connection status of the sensor Check the sensor location Check the resistance values of sensor	Operation-off	Outdoor sensor error
416	Excessive temperature emission	Not an error (discharge temp. control)	-	Outdoor unit protection control error
425	Power cable connection error	Check the status of power connection	Operation-off	Outdoor sensor error

Wired remote controller (cont.)

- If an error occurs  is displayed on the wired remote controller.
- To see an error code, please press the test button.

Error mode	Content	Measures	Product operation status in case of error	Error type
			Outdoor unit compressor/ outdoor unit fan	
450	Non-connection error of indoor and outdoor Communication wire (connected to the power terminal)	Check the status of power connection Check the connection status of the communication line	Operation-off	Self-diagnosis error
458	Outdoor fan 1 error	Check the input power connection status Check the connection status between the motor and PCB in outdoor unit Check the fuse of indoor/outdoor units	Operation-off	Self-diagnosis error
461	[inverter] Compressor operation error	Check the connection status of the compressor Check the resistance between different phases in compressor	Operation-off	Outdoor unit protection control error
462	Discharge current error/ PFC over-current error	Check the input power Check refrigerant is filled Check outdoor fan operates normally	Operation-off	Outdoor unit protection control error
464	[inverter] IPM over current error	Check refrigerant is filled Check the connection status of compressor and if it operates normally Check for any obstacles around indoor/outdoor units	Operation-off	Outdoor unit protection control error
467	[inverter] Compressor rotation error	Check the connection status of the compressor Check the resistance between different phases in compressor	Operation-off	Outdoor unit protection control error
468	[inverter] Current sensor error	Check PCB operates normally	Operation-off	Outdoor unit protection control error
469	[inverter] DC link voltage sensor error	Check the connection of input power Check the status of RY21 and R2000 of Inverter PCB	Operation-off	Outdoor unit protection control error
477	[inverter] OTP error	Check PCB operates normally	Operation-off	Outdoor unit protection control error
485	Outdoor fan 2 error	Check the connection status of input power Check the connection status of motor and outdoor PCB Check the fuse of indoor/outdoor unit	Operation-off	Self-diagnosis error
554	Gas leakage error	Check refrigerant is filled Check the indoor EVA sensor	Operation-off	Self-diagnosis error
556	Inconsistent volume	Check the indoor unit's option code	Operation-off	Outdoor unit protection control error

Wired remote controller (cont.)

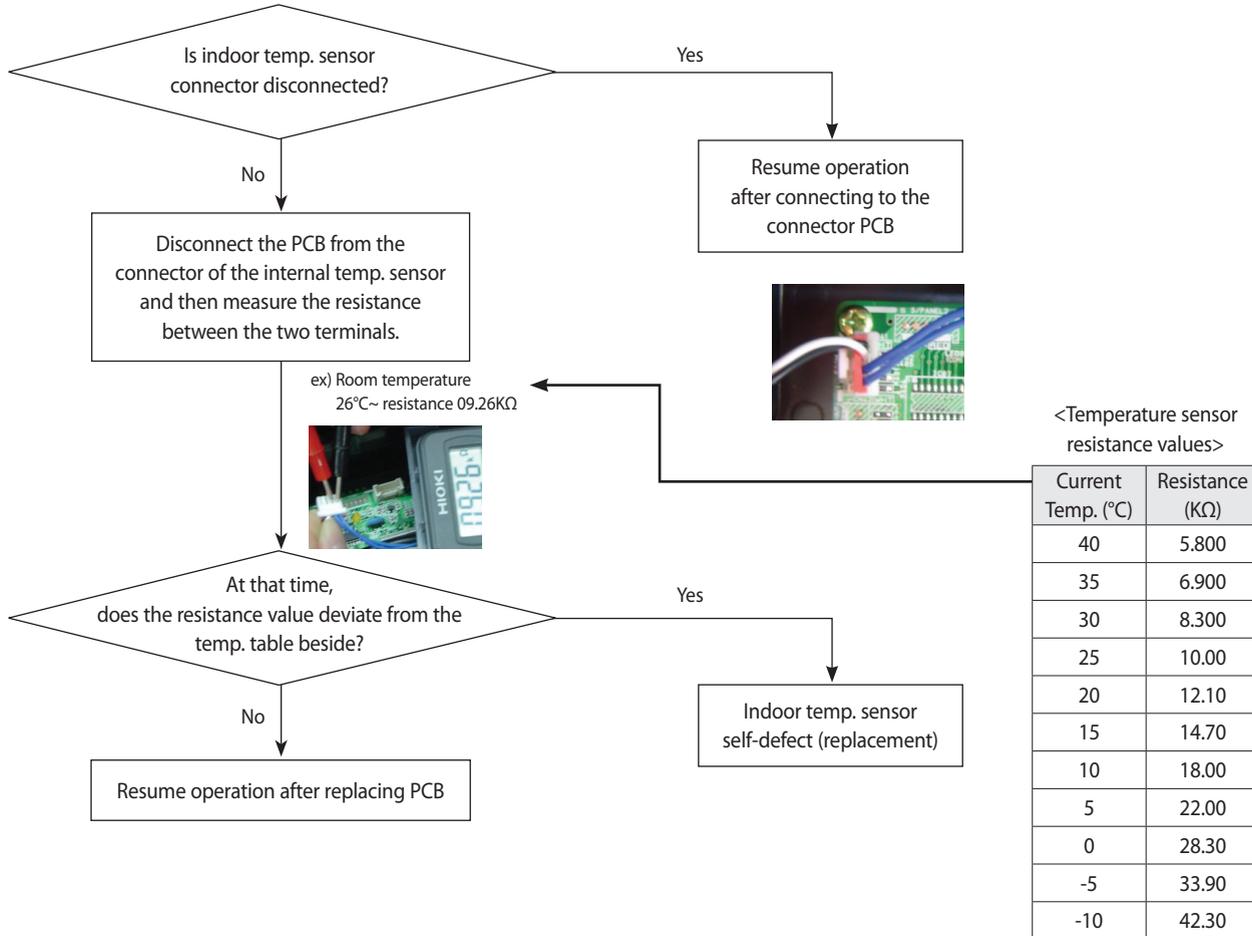

- If an error occurs  is displayed on the wired remote controller.
- To see an error code, please press the test button.

Error mode	Content	Measures	Product operation status in case of error	Error type
			Outdoor unit compressor/ outdoor unit fan	
<i>601</i>	Communication error between indoor unit and wired remote controller	Check the connection wire linking indoor unit and wired remote controller	Normal operation	Wired remote controller control error
<i>602</i>	Communication error between master and slave wired remote controller	Check the option switch that distinguishes master and slave (Available only for 1 master unit and 1 slave unit)	Normal operation	Wired remote controller control error
<i>606</i>	Cross installation error of COM1/COM2	Check the connection of outdoor unit and wired remote controller is linked to Com2 terminal of the indoor unit	Normal operation	Wired remote controller control error
<i>8EA</i>	Wired remote controller COM2 setting option error	Check the Dip switch for Com1 and Com2 is set to Com2	Normal operation	Wired remote controller control error

4-3 Fault Diagnosis by Symptom

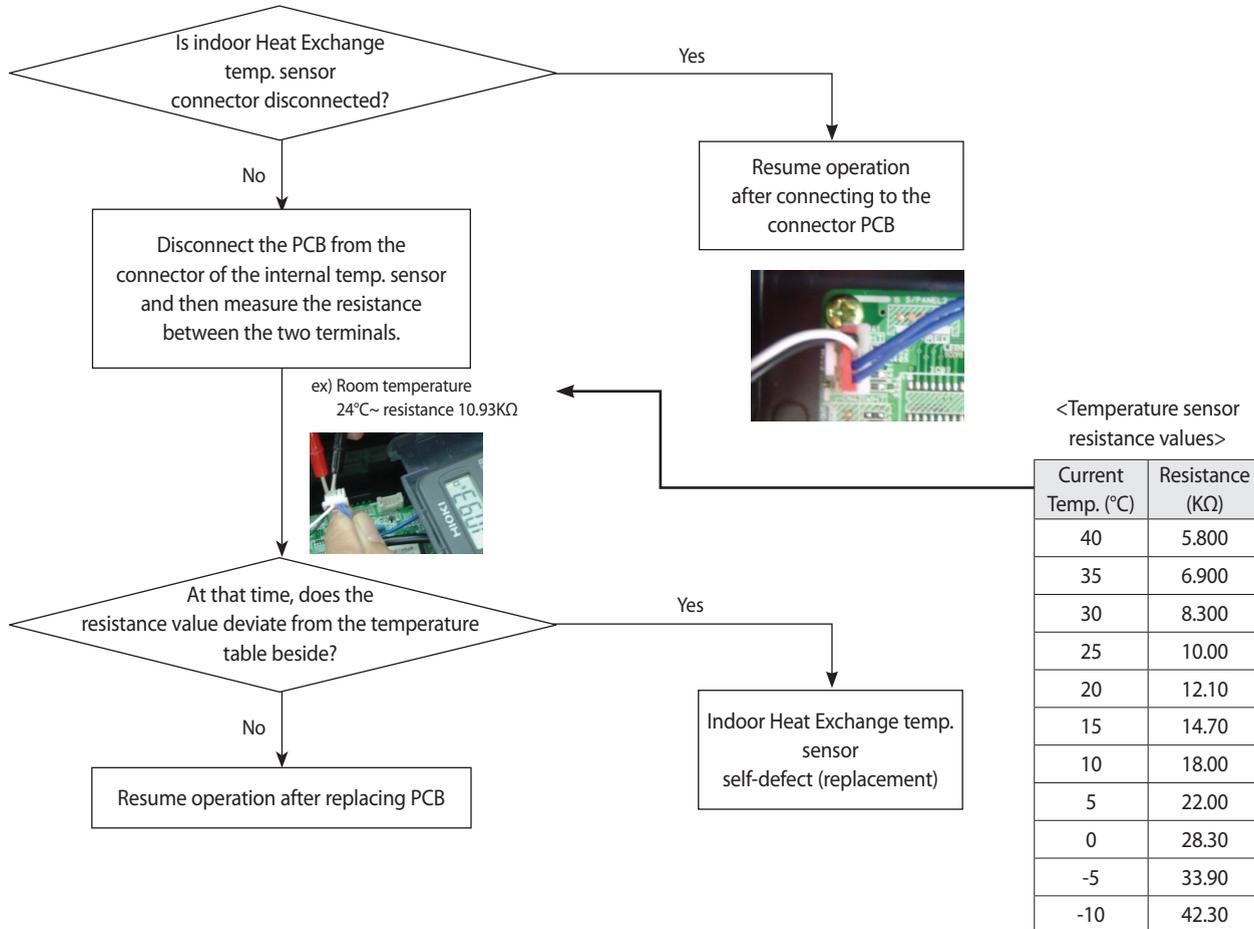

4-3-1 Indoor temperature sensor (open/short)

Indoor unit display	X(Operation) X(Defrost) ●(Reservation) X(Fan) X(Filter)
Criteria	In case of disconnection or short-circuit of the indoor temperature sensors
Cause of problem	Disconnection or short-circuit of the relevant sensors

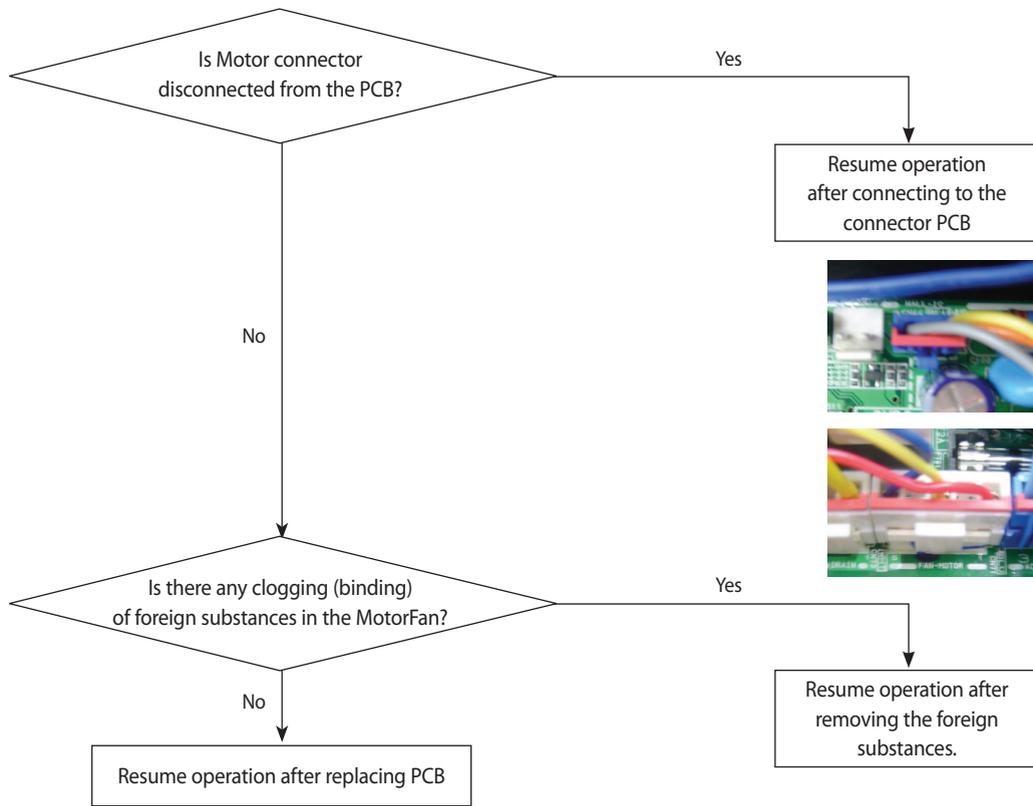

4-3-2 Indoor Heat Exchange temperature sensor (open/short)

Indoor unit display	●(Operation) X(Defrost) ●(Reservation) X(Fan) X(Filter)
Criteria	In case of disconnection or short-circuit of the heat exchanger of indoor temperature
Cause of problem	Disconnection or short-circuit of the relevant sensors

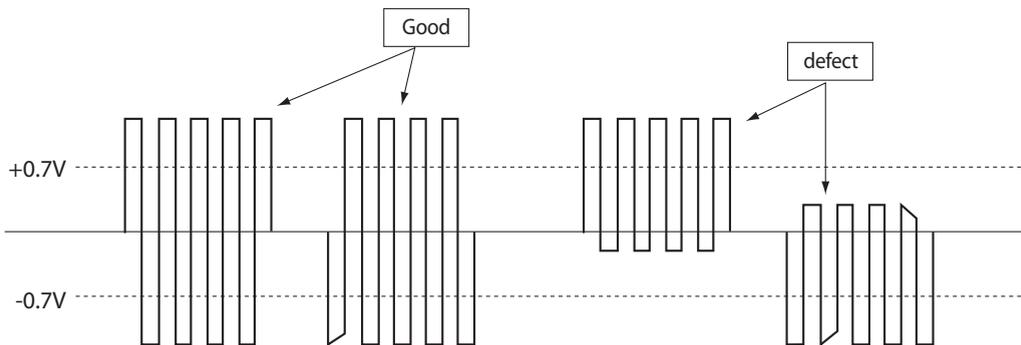

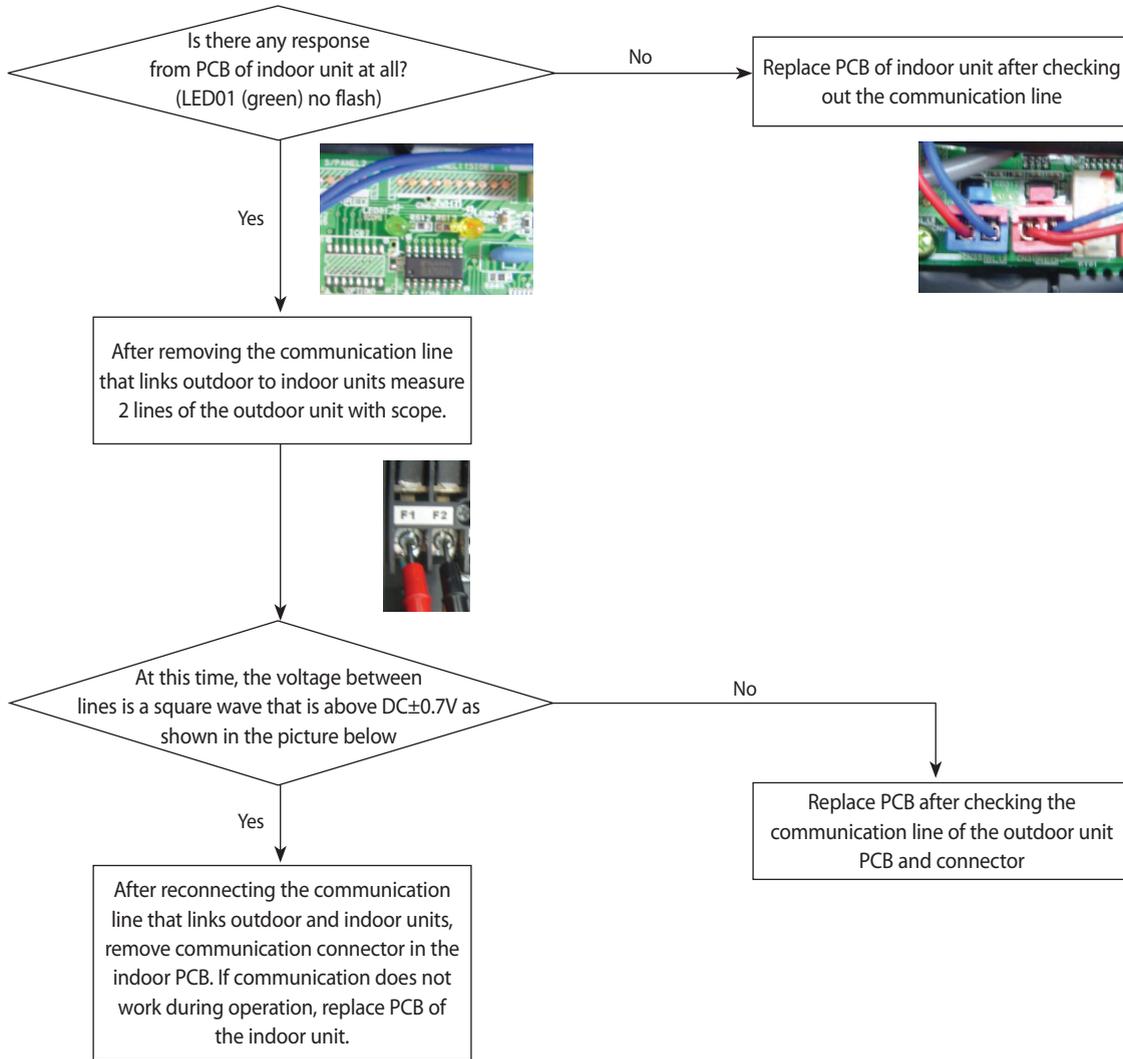

4-3-3 Indoor Fan error

Indoor unit display	X(Operation) X(Defrost) X(Reservation) ●(Fan) X(Filter)
Criteria	Indoor fan being non-operative/ stop after excessive high speed
Cause of problem	Check for motor connector disconnect/ check motor fan fastening

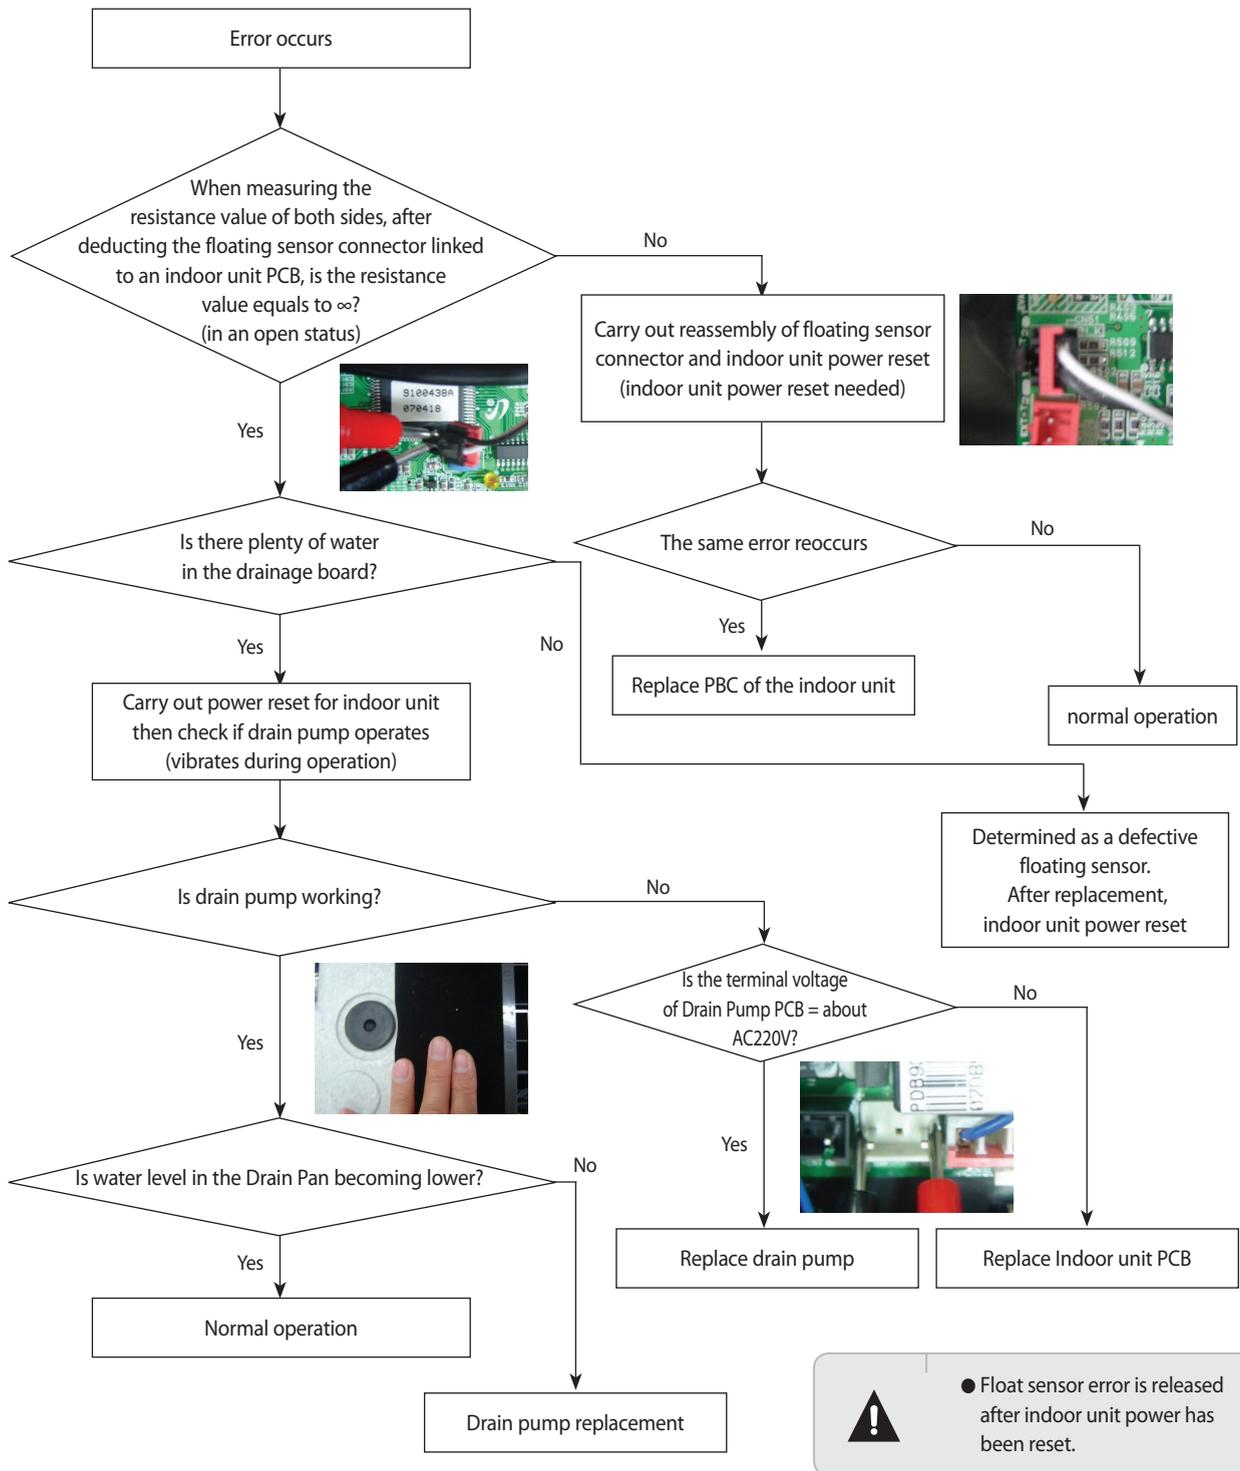

4-3-4 Communication error after completion of tracking

Indoor unit display	X(Operation) X(Defrost) ●(Reservation) ●(Fan) X(Filter)
Criteria	If communication between indoor and outdoor units has been blocked for 2 minutes during operation
Cause of problem	Communication error between indoor and outdoor unit

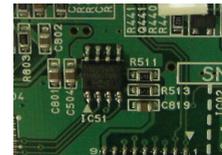

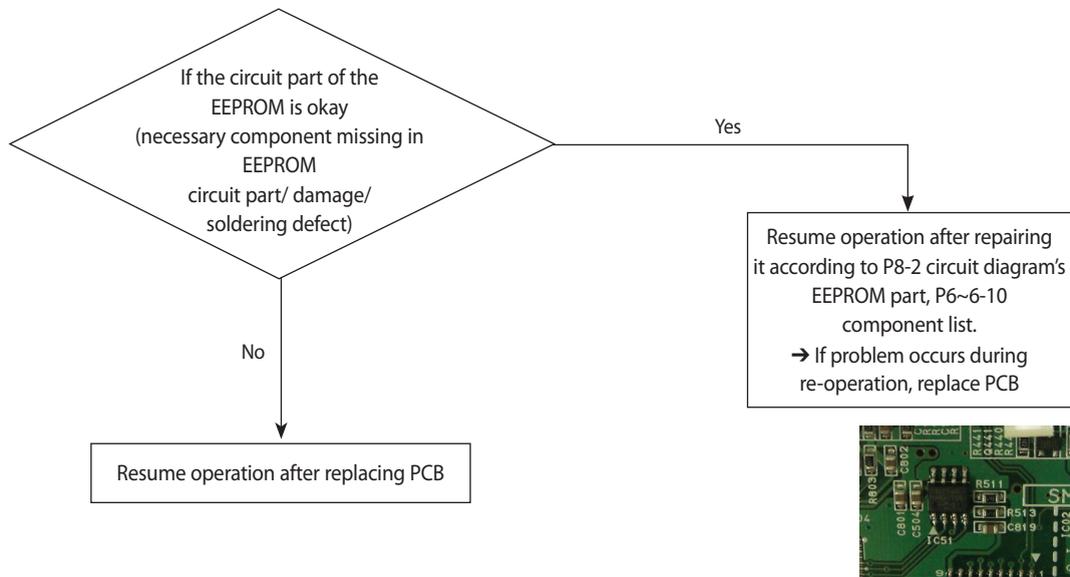

4-3-5 Indoor float sensor error

Indoor unit display	X(Operation) X(Defrost) X(Reservation) ●(Fan) ●(Filter)
Criteria	When the open status of the floating sensor of the indoor unit lasts for 1 minute or more.
Cause of problem	Increase in the drain board level for indoor drain pump defect, defect in detection sensor (float sensor)

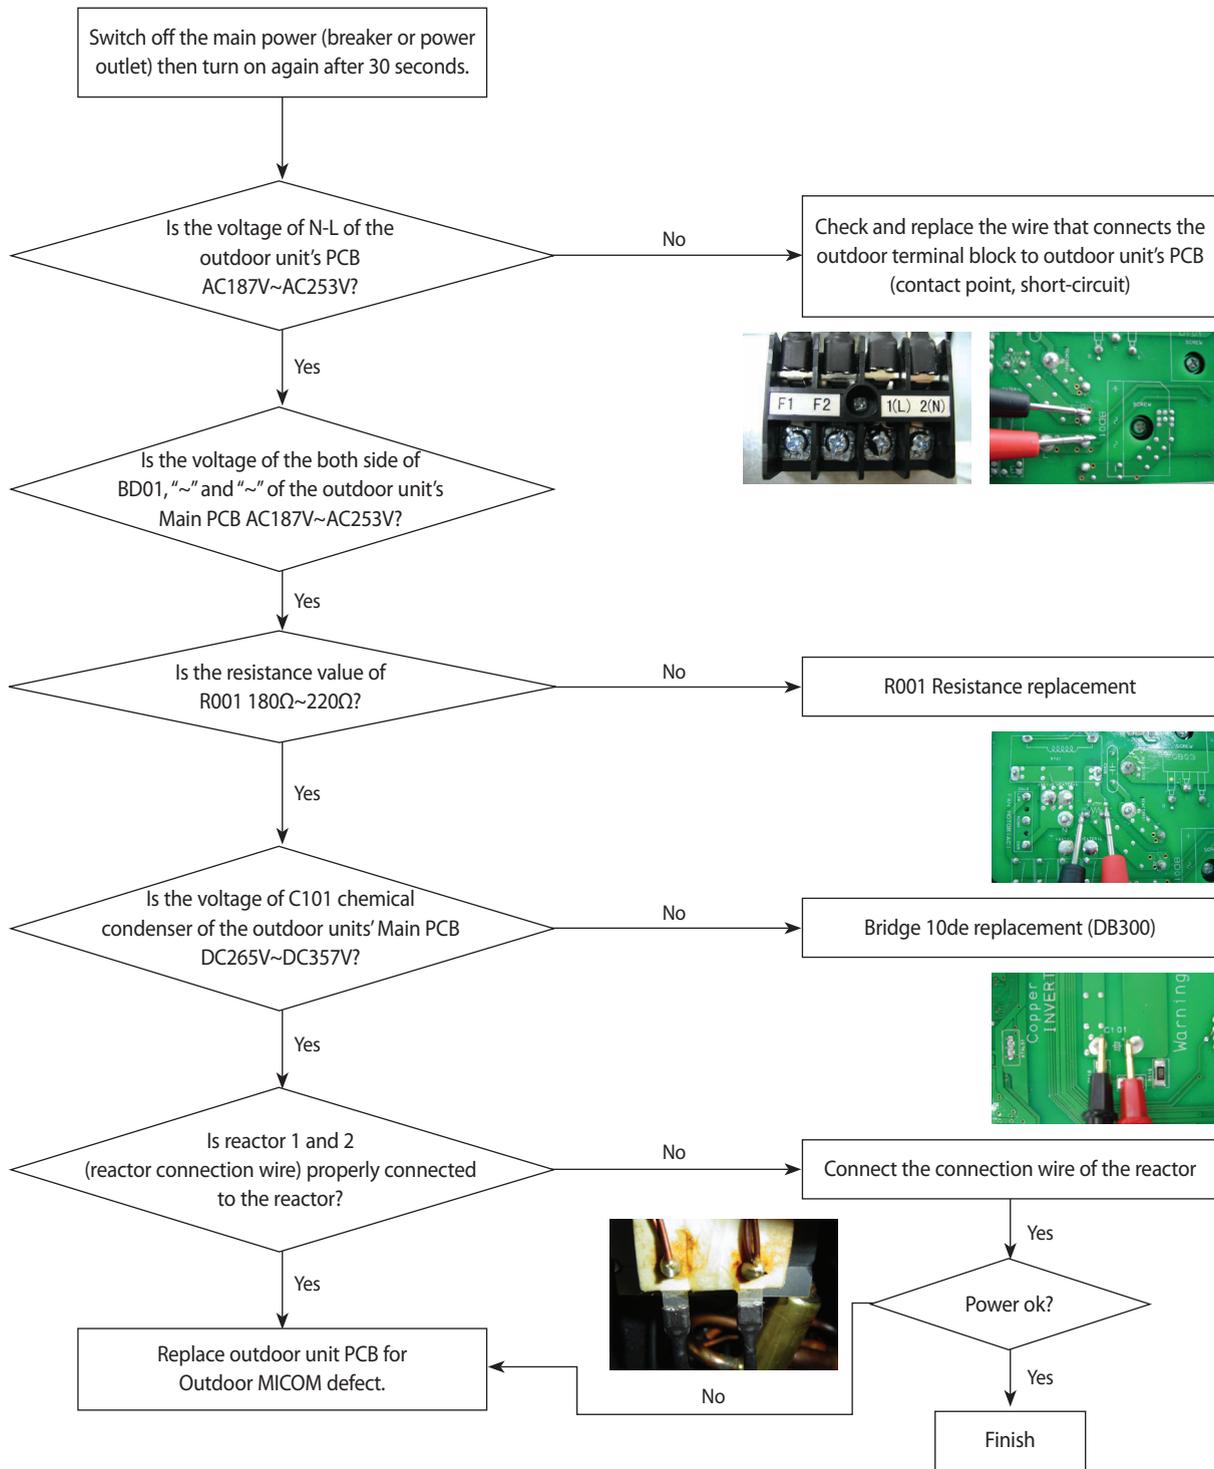

4-3-6 EEPROM circuit part defect

Indoor unit display	●(Operation) X(Defrost) ●(Reservation) ●(Fan) X(Filter)
Criteria	EEPROM circuit part defect
Cause of problem	EEPROM component defect/ necessary component missing in EEPROM circuit part/ damage/ soldering

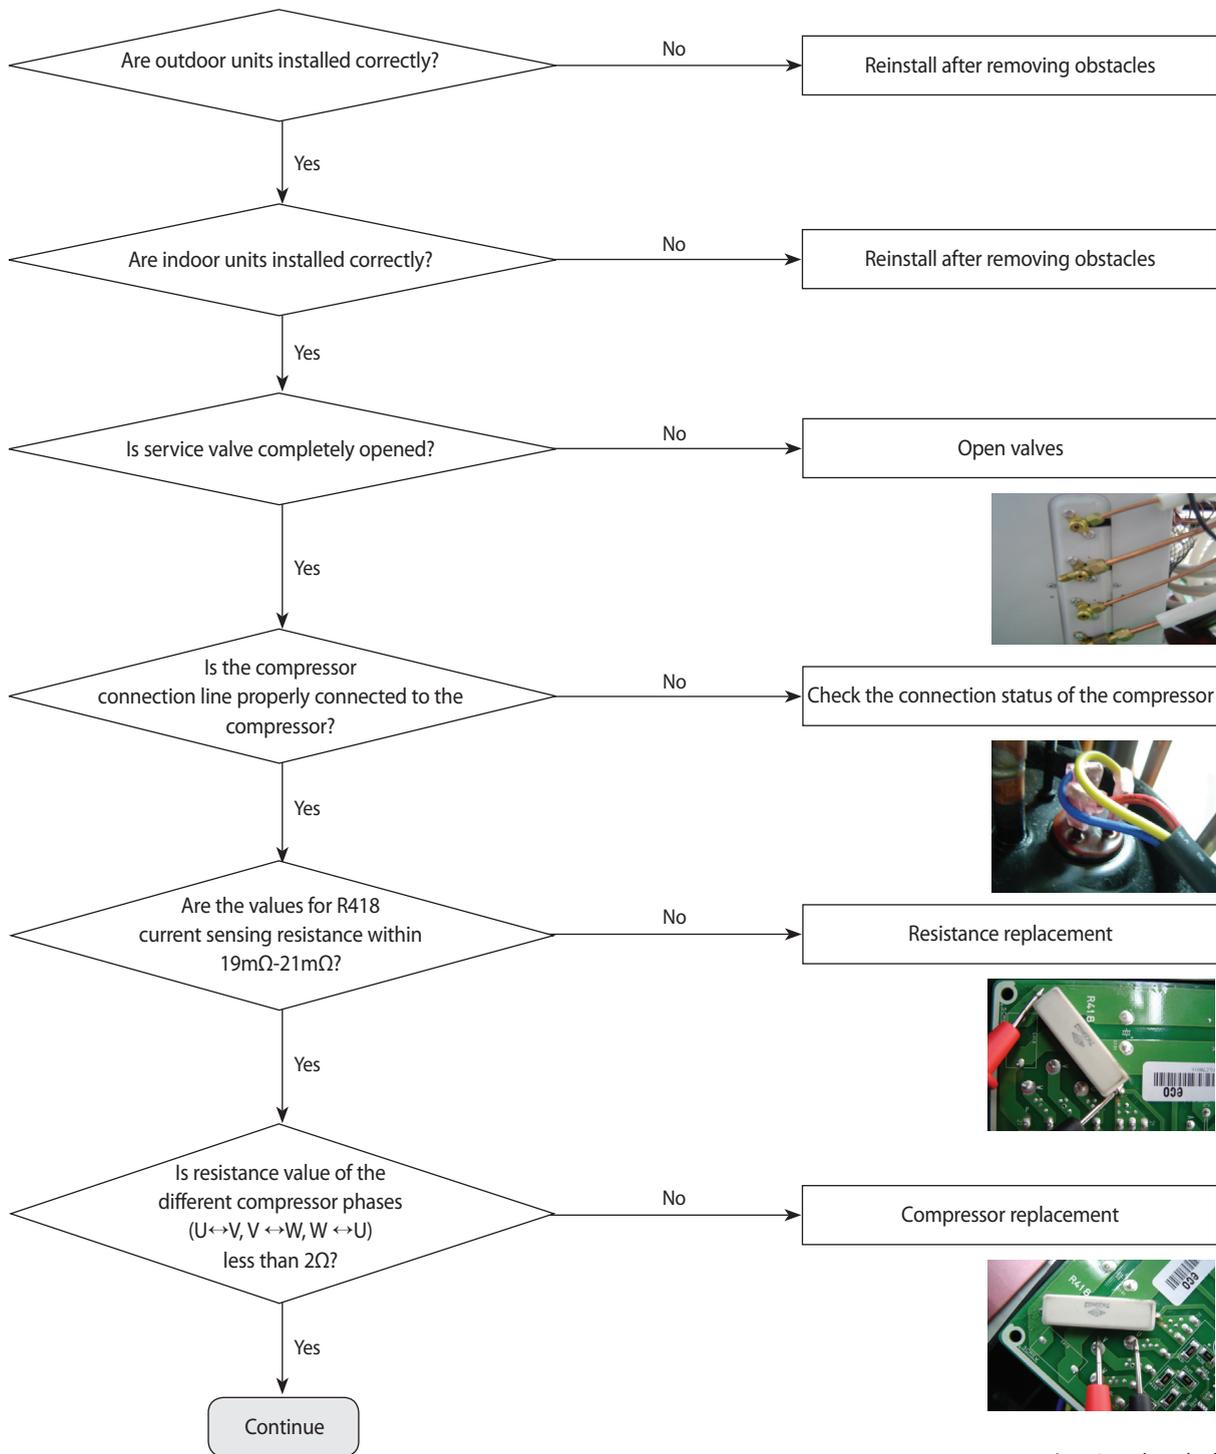

4-3-7 When outdoor units cannot be turned on

1. Cause of the breakdown
 - 1) Is power voltage 220V?
 - 2) Is AC power properly connected?
 - 3) Are the LEDs of Main PCB and inverter PCB of the outdoor unit on?
 - 4) Is the power supply of the outdoor unit 220V?
2. Inspection order

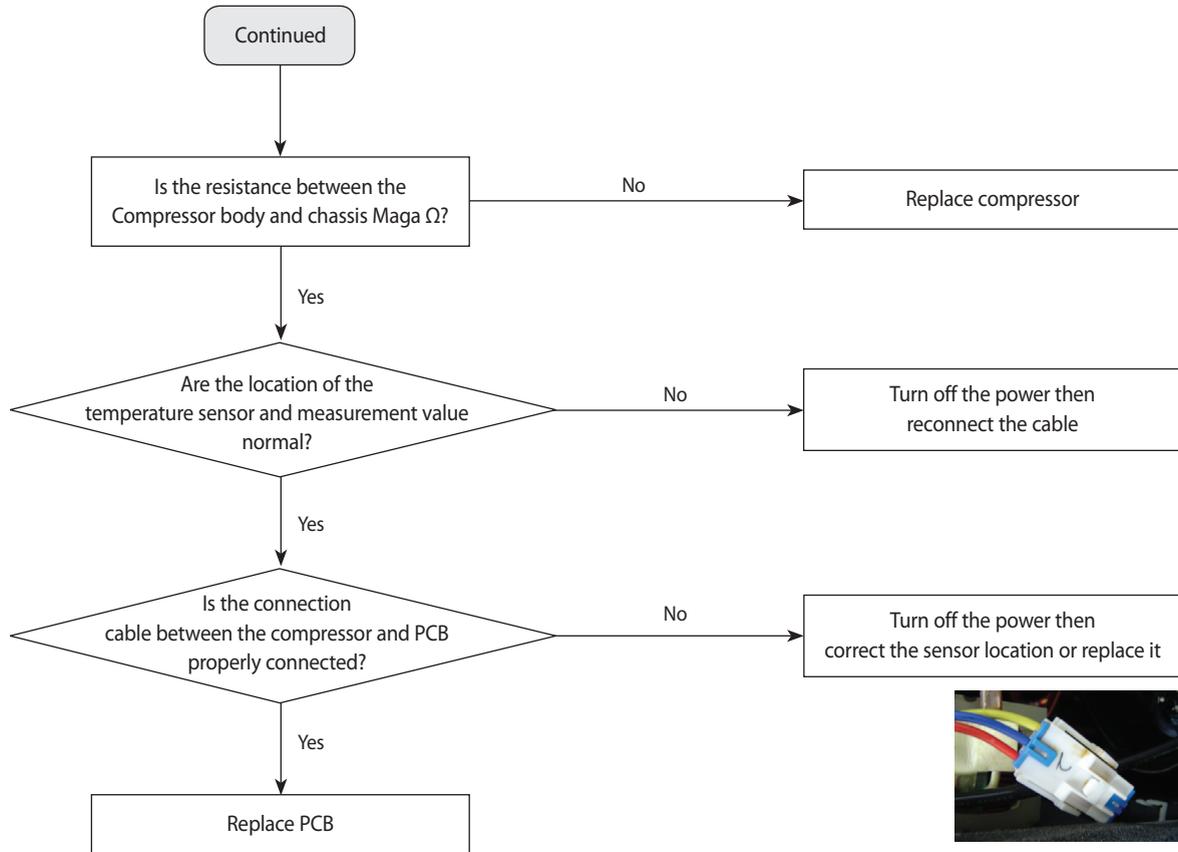

4-3-8 IPM and over current error

1. Inspection items
 - 1) Is refrigerant filled?
 - 2) Is the compressor operating without a problem?
 - 3) Is the compressor connected properly?
 - 4) Are there any obstacles around the indoor/outdoor units?
2. Inspection order

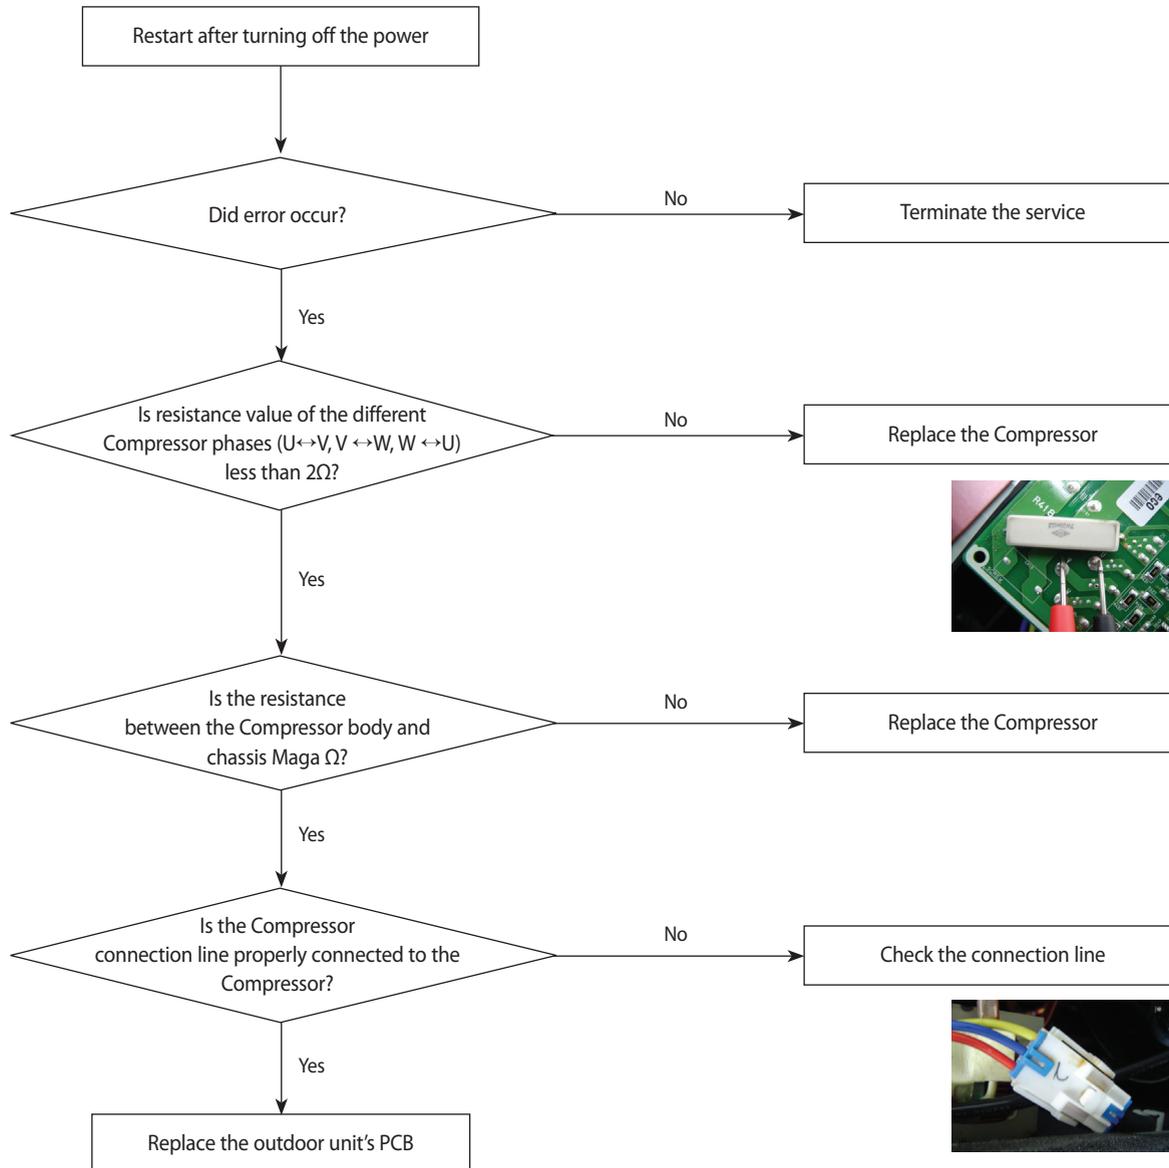

(continued on the back)

IPM and over current error (cont.)

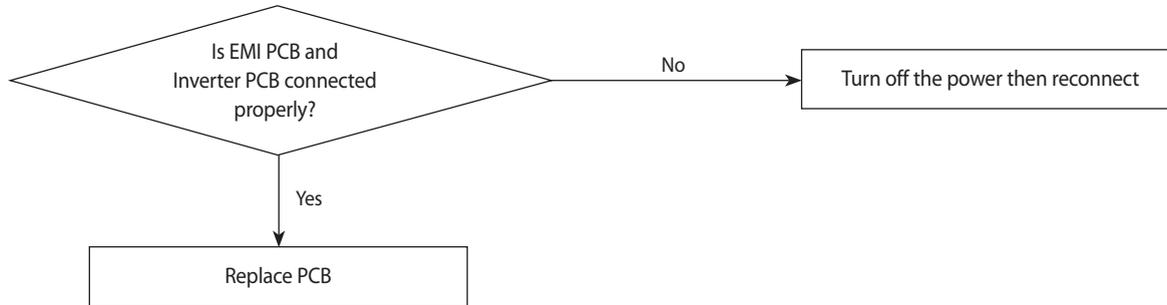

4-3-9 Compressor starting error, compressor locking error, compressor revolving error

1. Inspection items
 - 1) Is the connection line between power and the compressor properly connected?
 - 2) Is the resistance between different compressor phases normal?
2. Inspection order

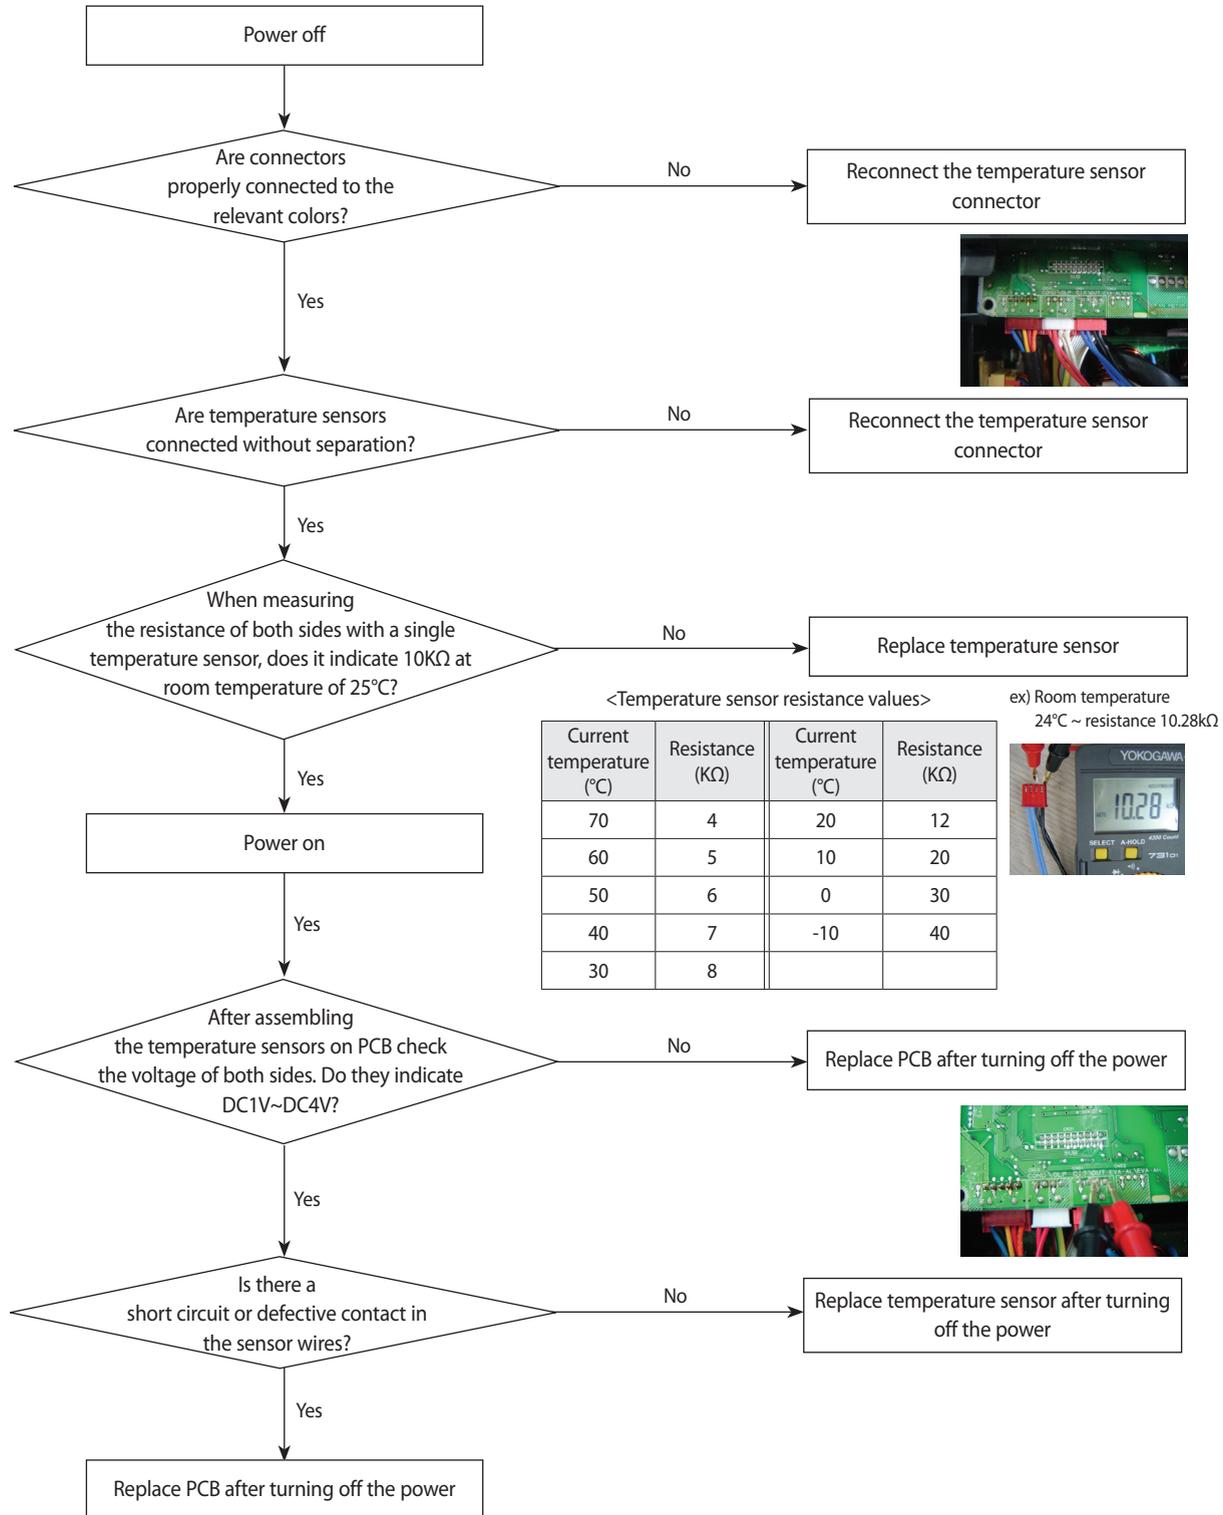

4-3-10 DC link and over/lower voltage error

1. Inspection items
 - 1) Is compressor operating properly?
 - 2) Is there a connection between input power and power?
2. Inspection order

4-3-11 Outdoor temperature sensor error

1. Inspection items
 - 1) Are the sensors connected properly?
 - 2) Are the sensors located properly?
 - 3) Do the resistance values of the sensors satisfy each temperature?
2. Inspection order

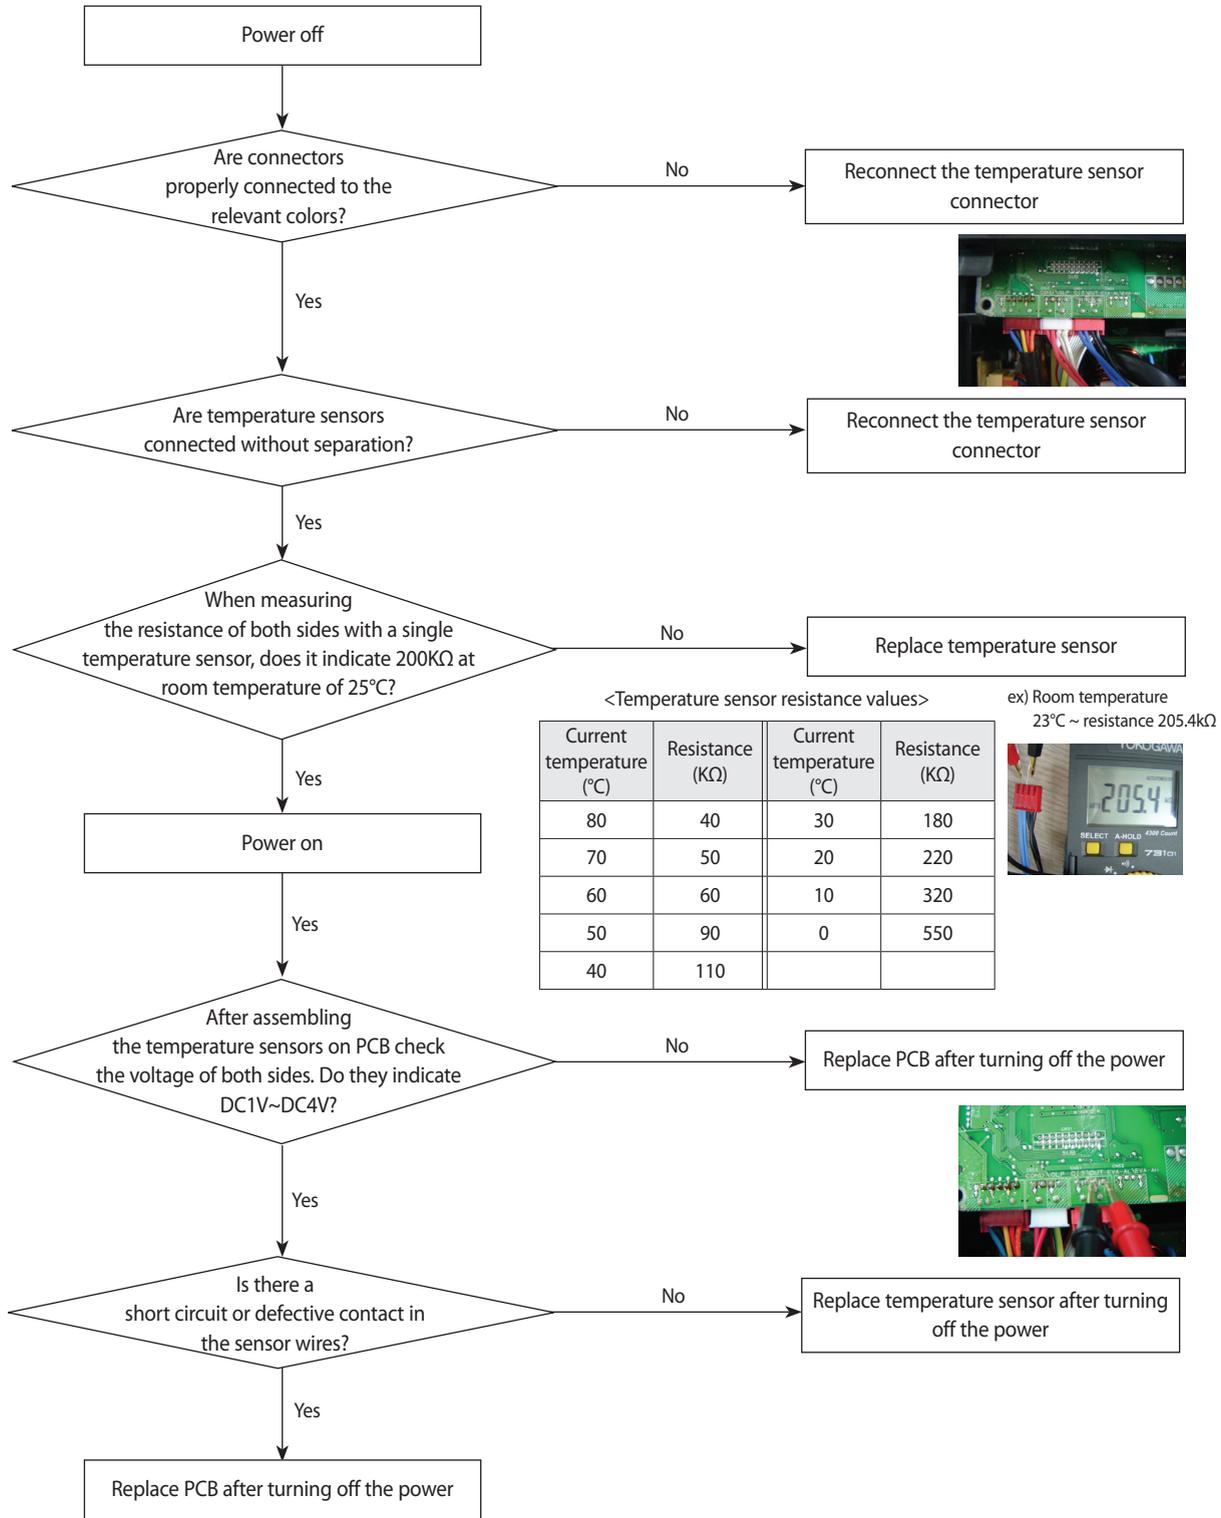

4-3-12 Emission temperature sensor error

1. Inspection items

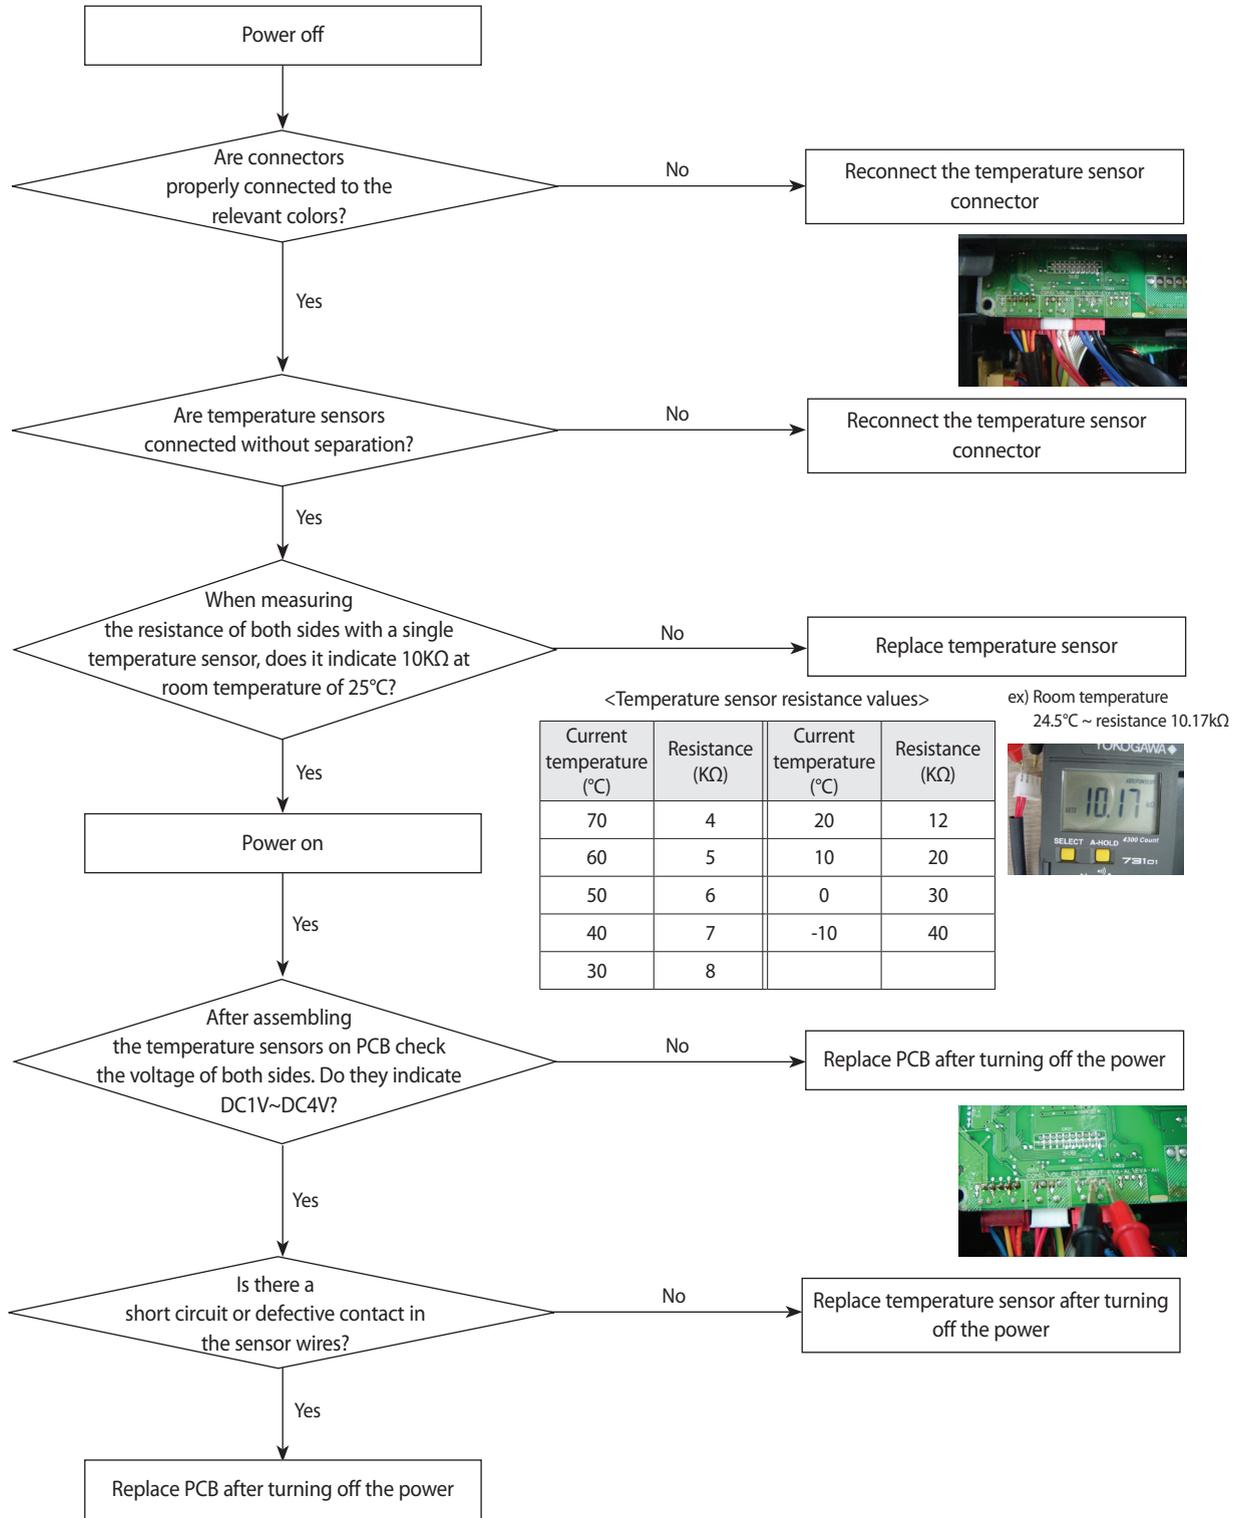

- 1) Are the sensors connected properly?
- 2) Are the sensors located properly?
- 3) Do the resistance values of the sensors satisfy each temperature?

2. Inspection order

4-3-13 Cond temperature sensor error

1. Inspection items
 - 1) Are the sensors connected properly?
 - 2) Are the sensors located properly?
 - 3) Do the resistance values of the sensors satisfy each temperature?
2. Inspection order

<Temperature sensor resistance values>

Current temperature (°C)	Resistance (KΩ)	Current temperature (°C)	Resistance (KΩ)
70	4	20	12
60	5	10	20
50	6	0	30
40	7	-10	40
30	8		

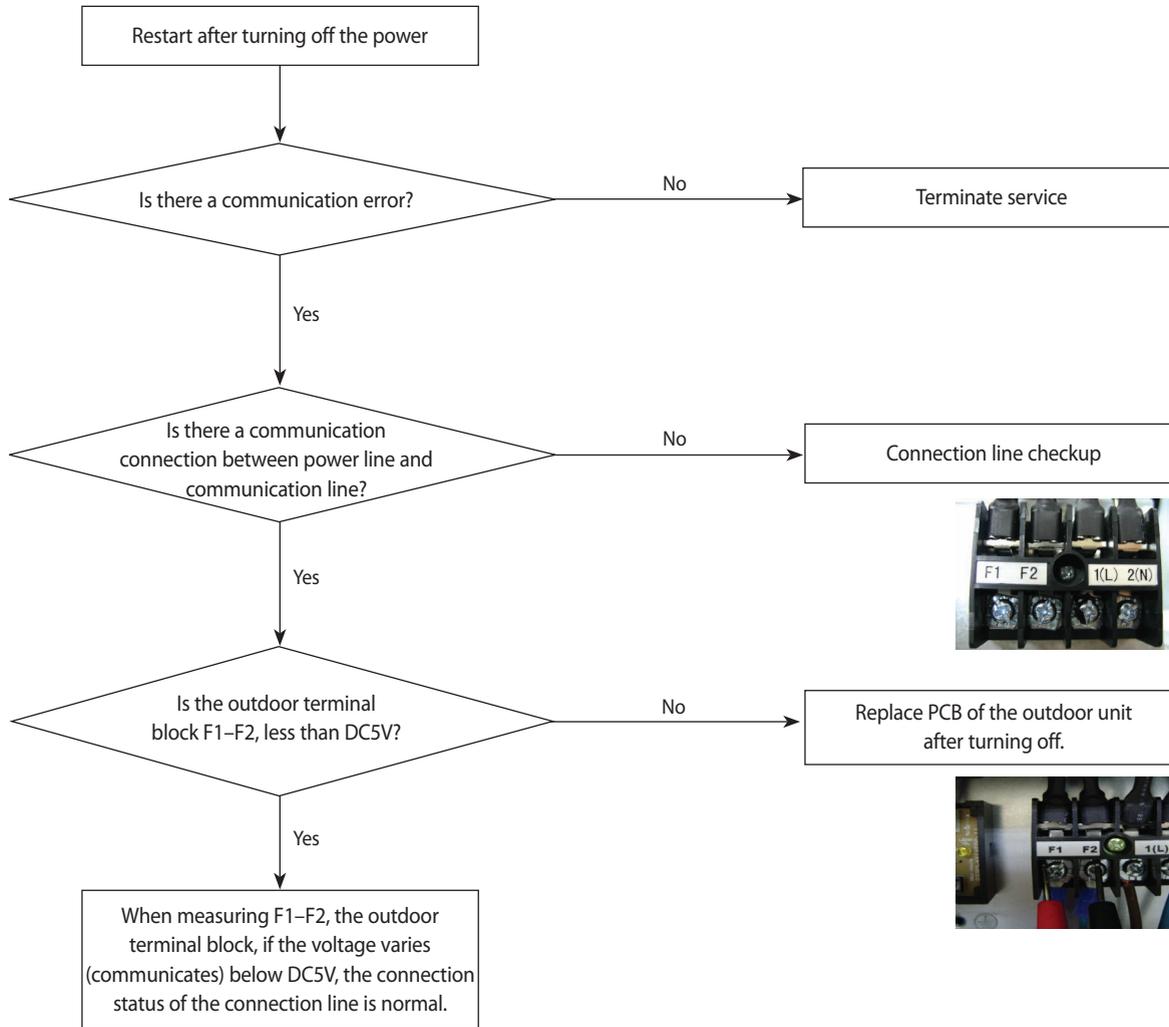

ex) Room temperature 24.5°C ~ resistance 10.17kΩ

4-3-14 Communication error between indoor/outdoor units (1 min.)

1. Inspection items

- 1) Is the communication line between indoor and outdoor units connected properly?
- 2) Is there a communication connection between power line and communication line?

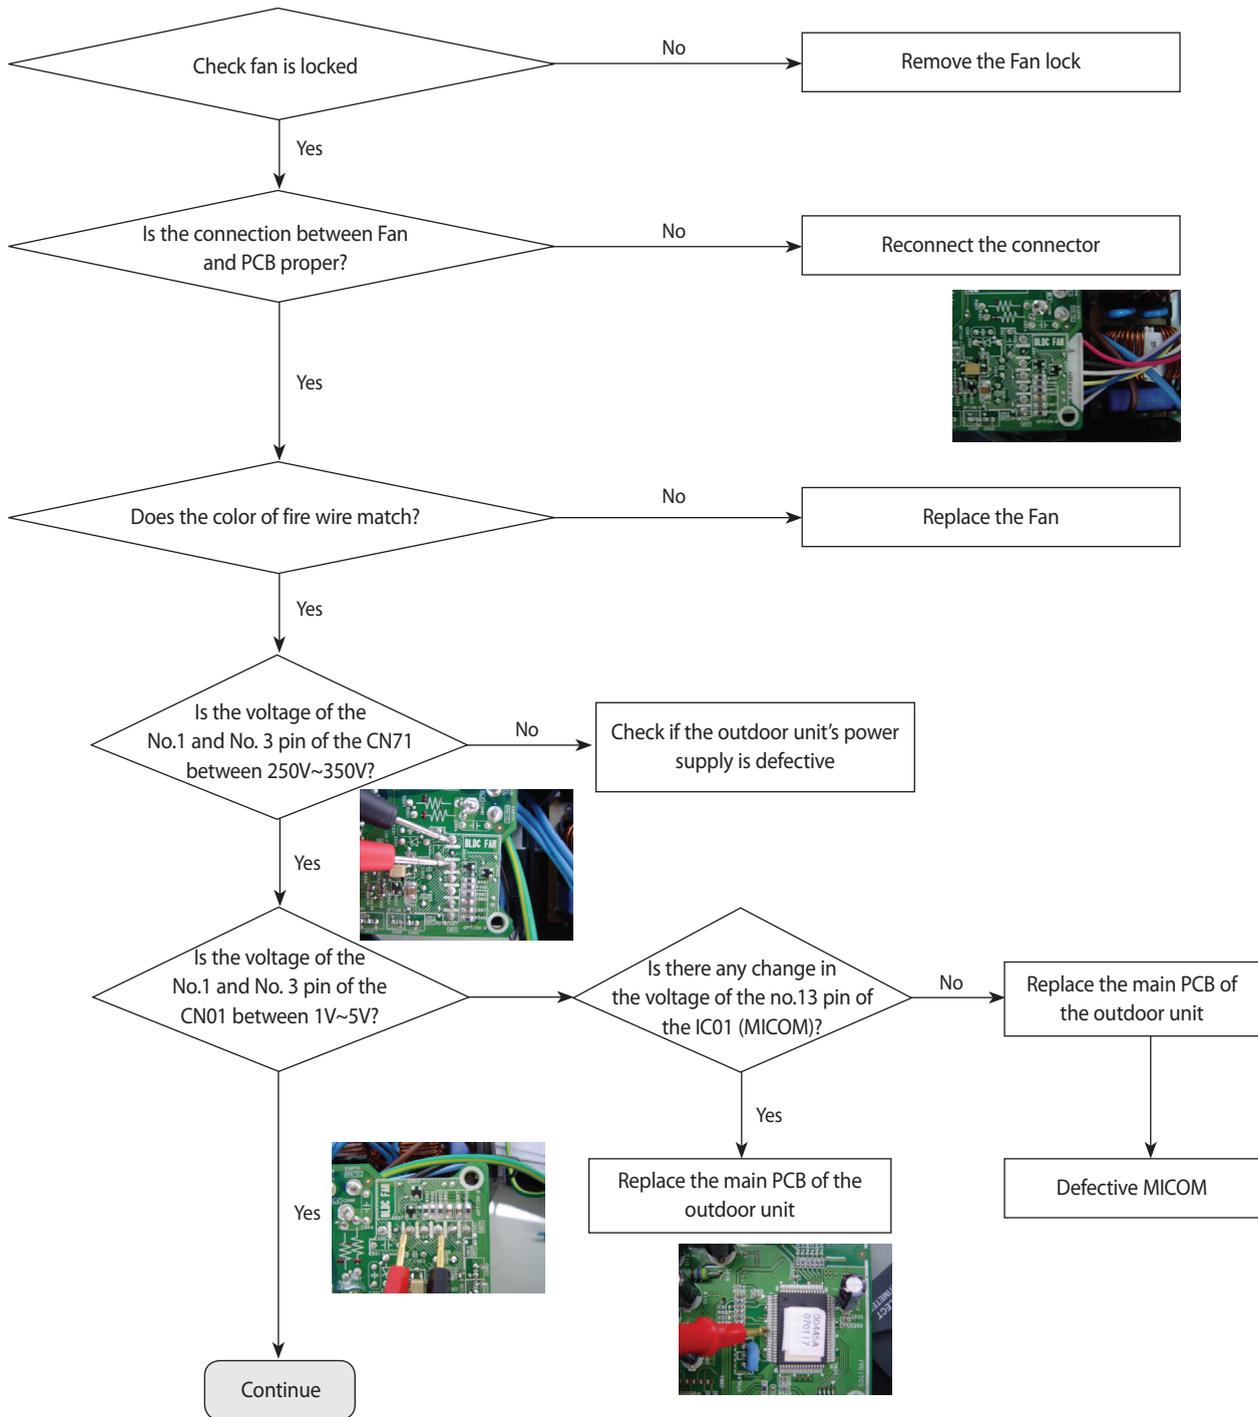

2. Inspection order

4-3-15 Outdoor fan error

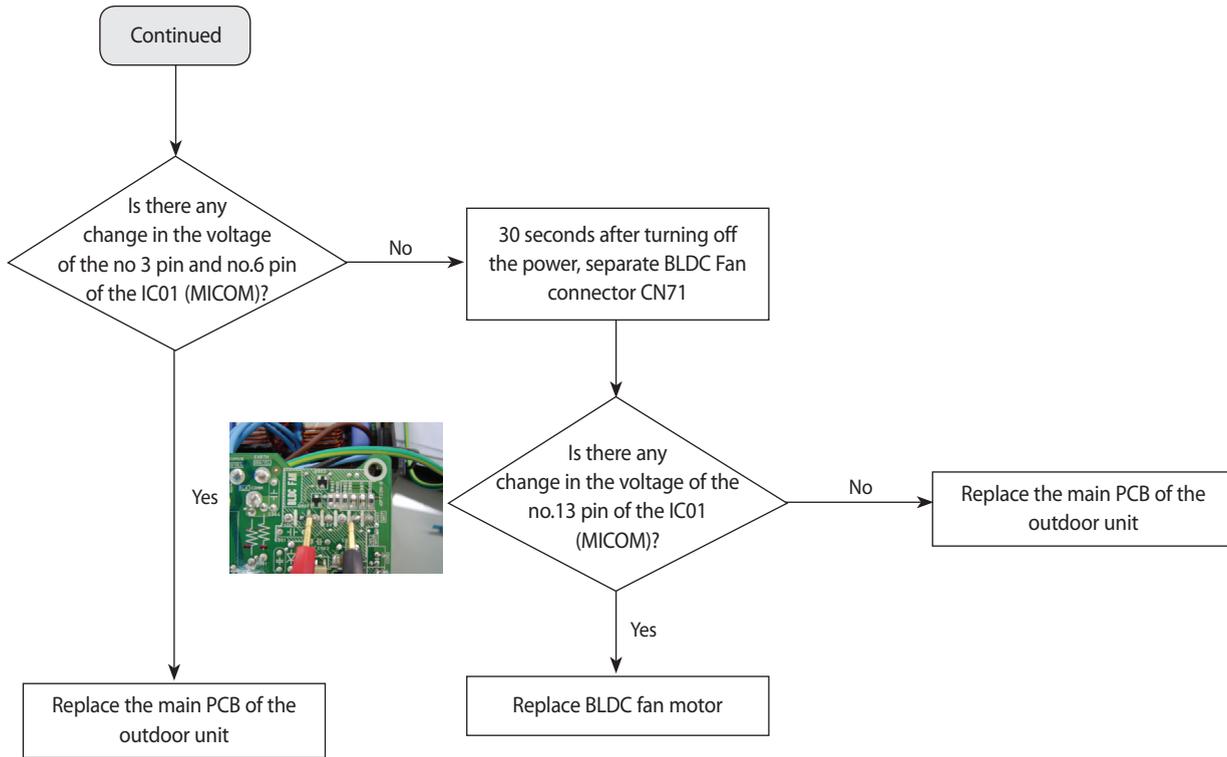

1. Inspection items
 - 1) Is input power and power connected properly?
 - 2) Is motor connection line properly connected to the PCB of the outdoor unit?
 - 3) Is the fuse for indoor/outdoor unit connected?
 - 4) Are there any obstacles around Motor or Propeller?
 - 5) Is Motor Driver out of order?

2. Inspection order

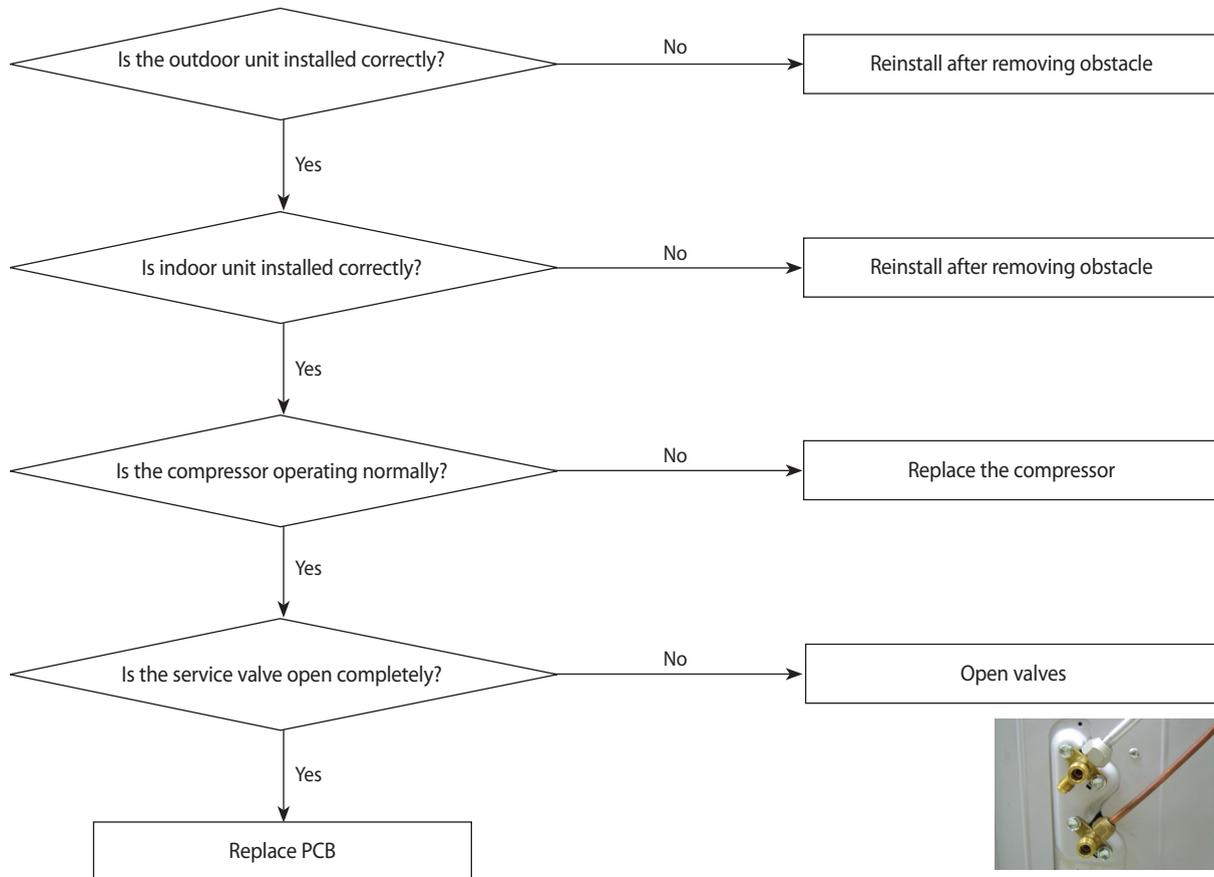

(continued on the back)

Outdoor fan error (cont.)

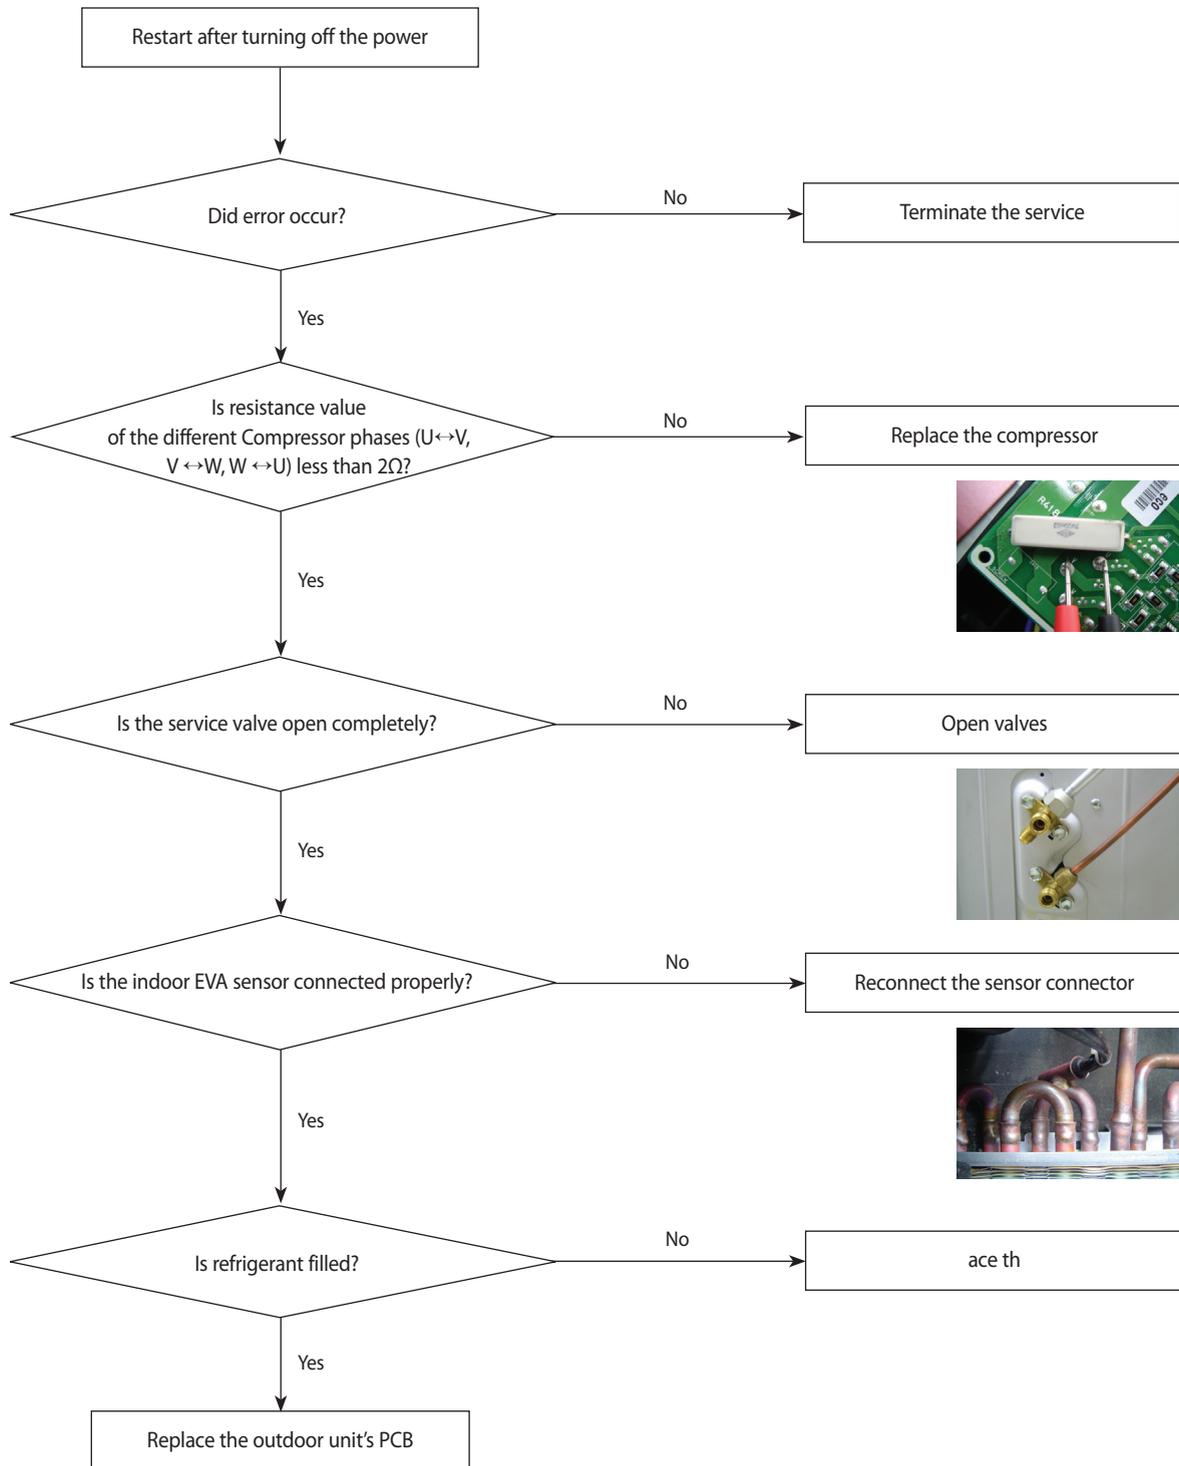

4-3-16 Discharge current error/ PFC over-current error

1. Inspection items
 - 1) Is input power correct?
 - 2) Is refrigerant filled?
 - 3) Is the outdoor fan spinning correctly?
 - 4) Are there any obstacles around indoor/outdoor units?
2. Inspection order

4-3-17 Gas leakage error

1. Inspection items
 - 1) Is refrigerant filled?
 - 2) Is the indoor EVA sensor connected properly?
2. Inspection order

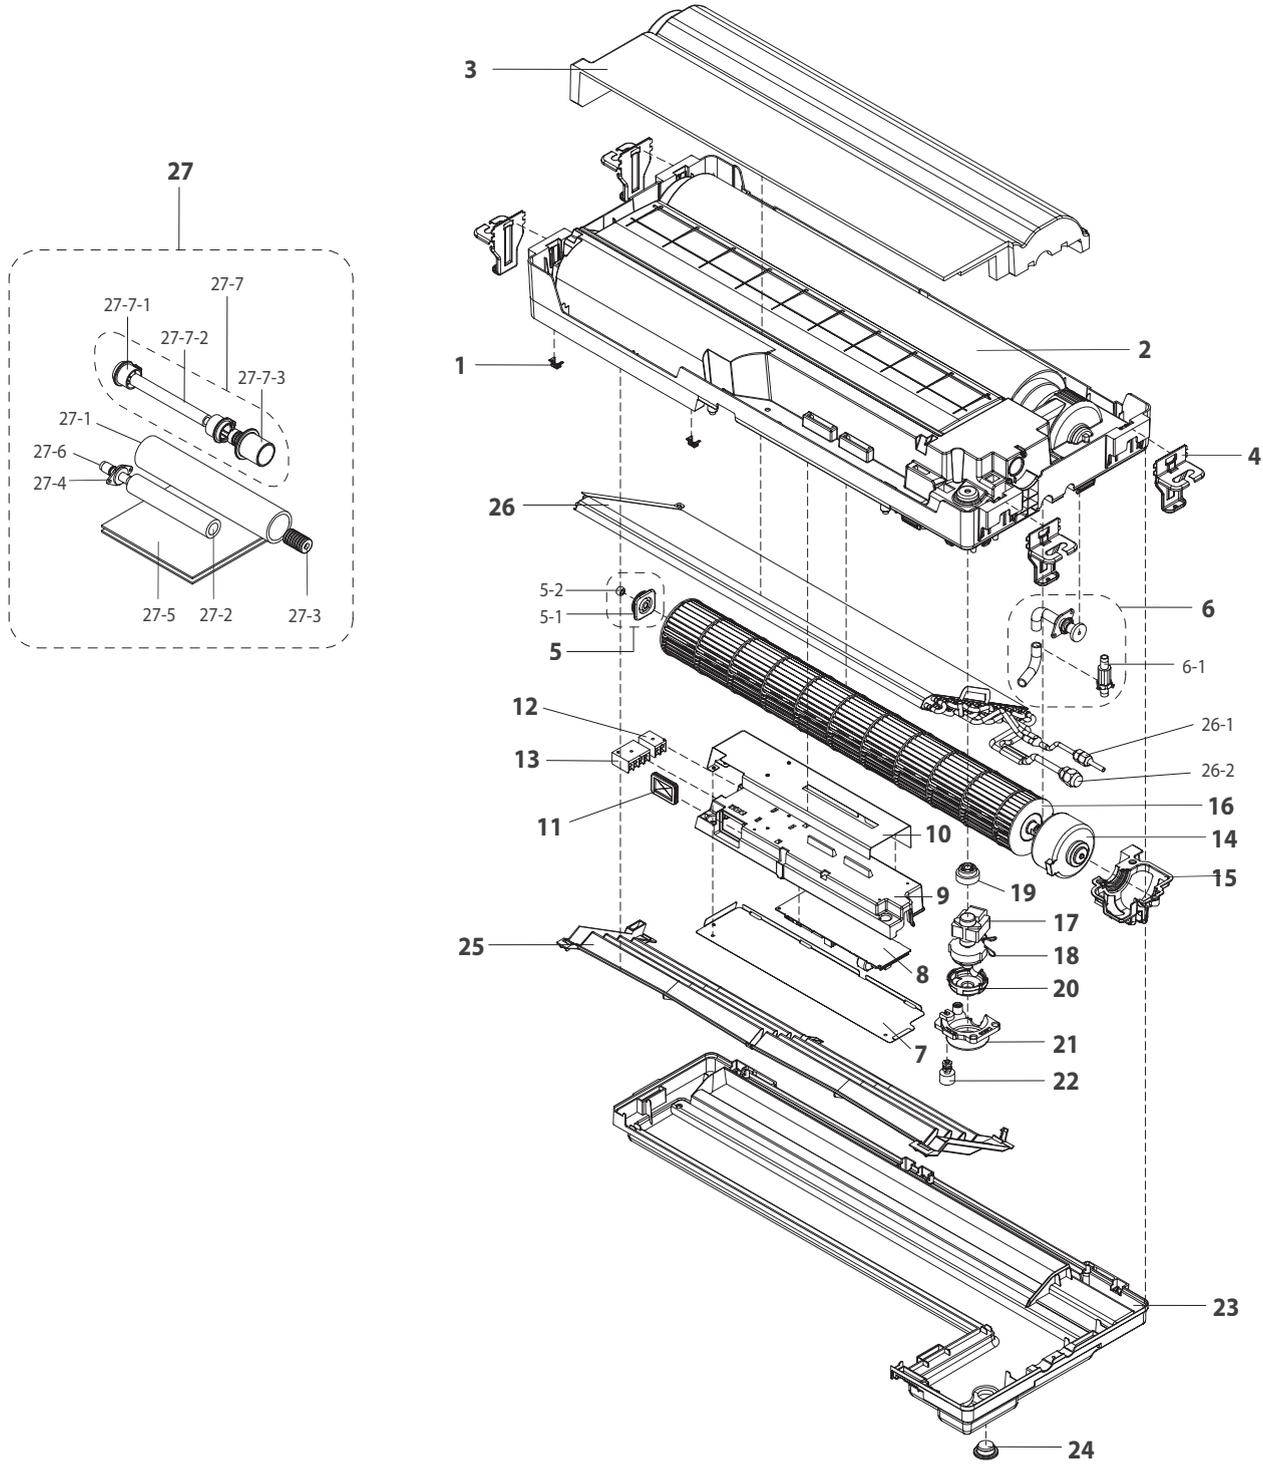

4-3-18 Other

1. Current sensor error
Check PCB operates normally then replace the PCB
2. Compressor V limit error
Check the compressor operates normally then replace the compressor. If an error still occurs after the replacement of the compressor, replace the PCB
3. OTP error
Check PCB operates normally then replace the PCB
4. DC link Voltage Sensor Error
Check the connection between input power and the power is okay then replace the PCB
5. AC zero Crossing signal out error
Check the connection between input power and the power is okay then replace the PCB
6. Inconsistent volume
Check the option code of the indoor unit.

5. Exploded Views and Parts List

MEMO

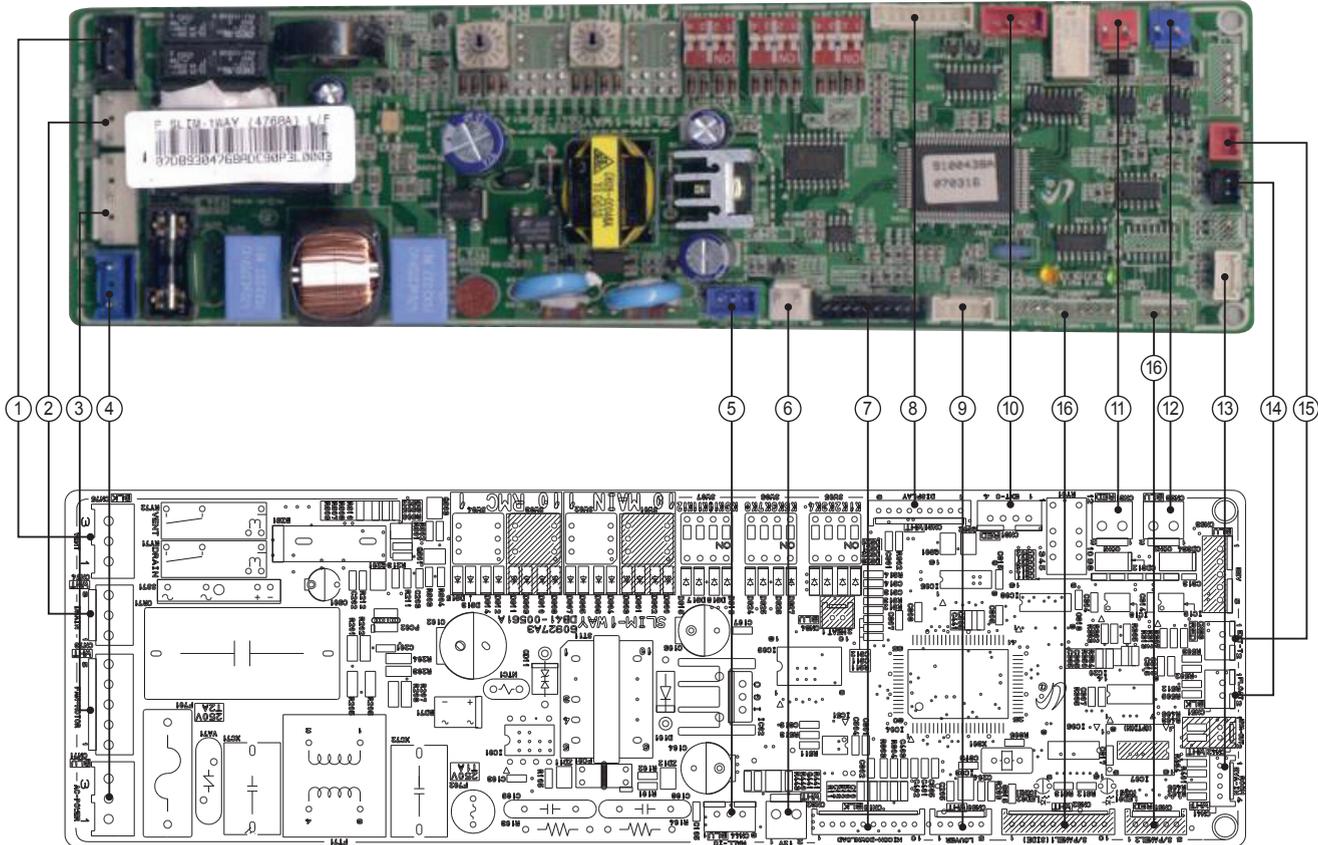

6. PCB Diagram and Parts List

6-1 PCB Diagram

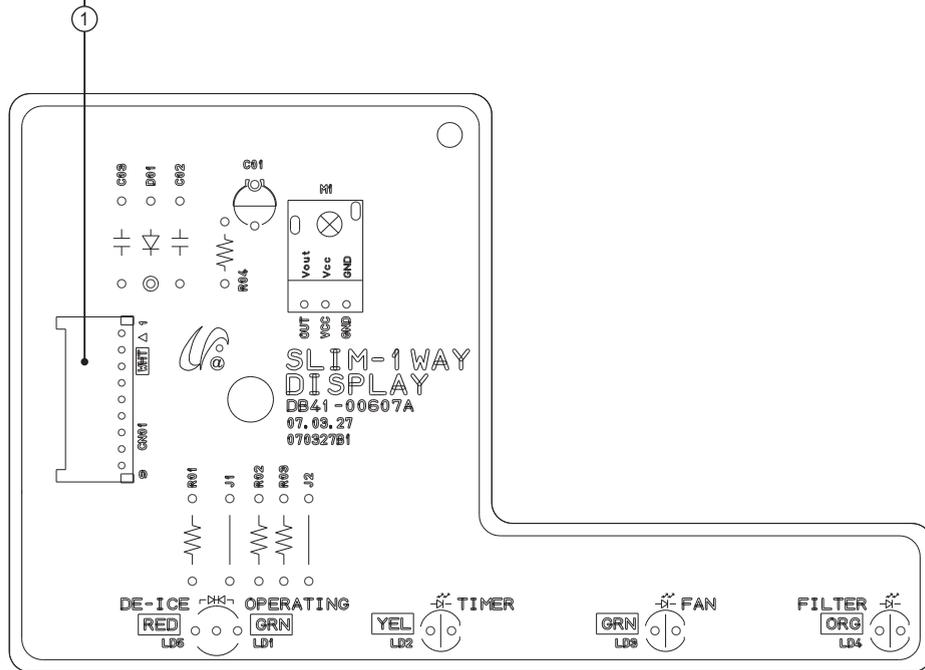

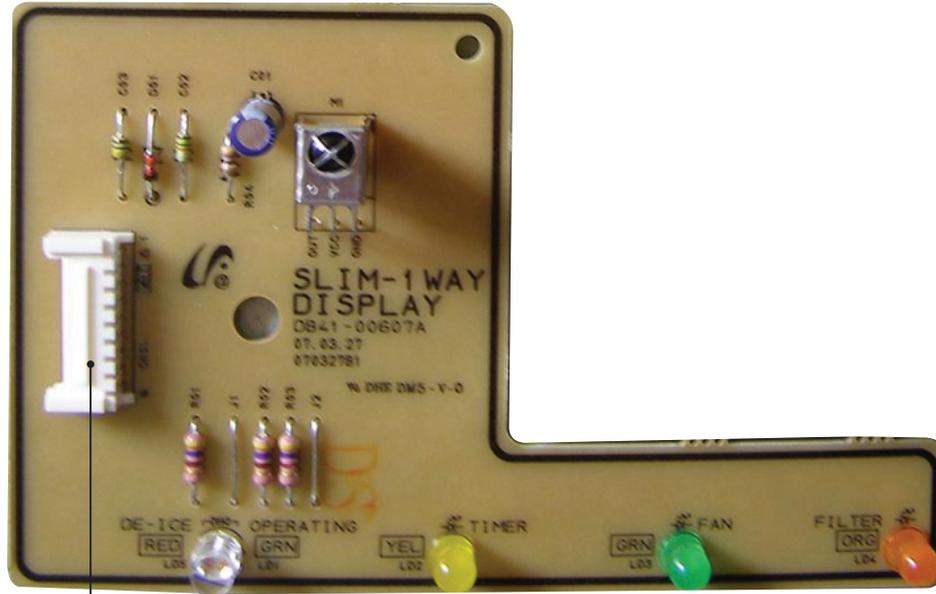

6-1-1 Indoor Unit

■ MAIN PCB

AC connection Connector	① CN75 : Ventilator Output	② CN74 : Drain Motor Output	③ CN73 : Fan Motor Output #1 : Capacitor output #2 : SSR output #3 : Common	④ CN71 : AC Power Input
DC connection Connector	⑤ CN44 : RPM Feedback #1 : VCC(DC5V) #2 : GND #3 : RPM Feedback	⑥ CN32 : DC12V Output #1 : DC12V #2 : GND	⑦ CN10 : Micom Down Not applicable in the installation site → For developer	⑧ CN91 : Panel Display Receiver #1~5 : Control display LED #6 : Not used #7 : Receive signal form a wireless remote controller #8 : GND #9 : VCC(DC5V)
	⑨ CN60 : Fan Direction Louver Output #1 : DC12V #2~5 : Output louver control signal	⑩ CN81 : External Contract Point Control Check #1 : DC12V #2 : Error signal output #3 : DC12V #4 : Comp signal output	⑪ CN31 : COM1 Communication (between indoor-outdoor units) #1 : Comm. Signal F1 #2 : Comm. Signal F2	⑫ CN32 : COM2 communication (between indoor-wired remote controller) #1 : Comm. Signal F3 #2 : Comm. Signal F4
	⑬ CN41 : Indoor Unit Temperature Sensor #1 : ROOM temp. sensor #2 : GND #3 : EVA - In temp. sensor #4 : GND	⑭ CN51 : Float Sensor #1 : Float S/W sensor #2 : GND	⑮ CN83 : External Contact Point Control(ON/OFF Timer) #1 : On/Off contact point signal input #2 : GND	⑯ CN61, CN62 : Slide Panel #1, 6 : DC12V Stepping motor output #2~5 : Motor control signa output #7~10 : Not Used

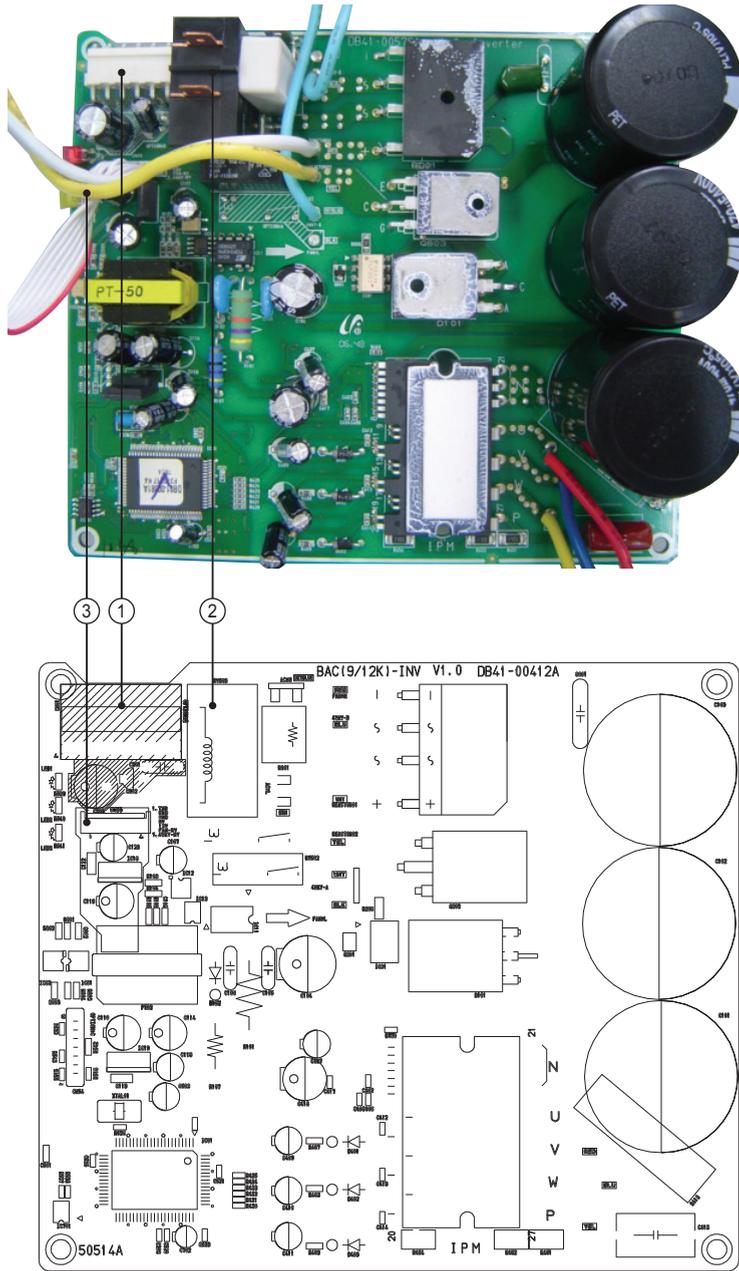

6-1-2 Panel

DC connecting connector	① CN01 : Connect the Main PBA of the Indoor Unit
	#1~5 : Control Display LED #6 : Not used #7 : Receive signals from wireless remote controller #8 : GND #9 : VCC (DC5V)

6-1-3 Outdoor Unit

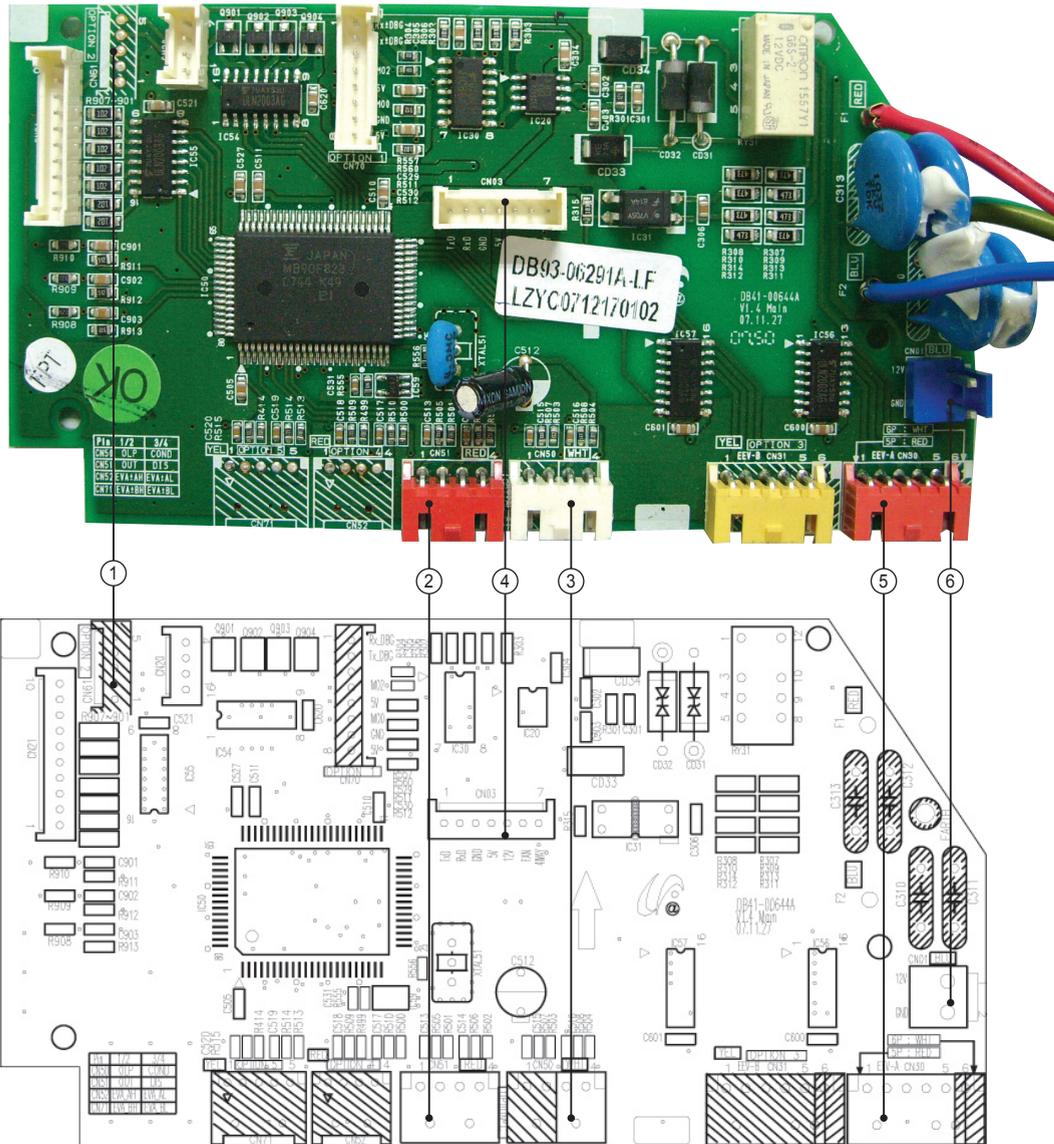

■ INVERTER PCB

<p>① CN01 (7PIN/WHT) : BLDC Fan</p> <p>#1 : DC link voltage #2 : Not used #3 : GND #4 : 16V #5 : Detect FAN RPM #6 : FAN FG #7 : Detect fan counter rotation</p>	<p>② RY503 : Power Relay</p> <p># Upper Pin : Power Input # Lower pin : Send power to the circuit</p>	<p>③ CN55(7PIN/WHT) : Main PCB</p> <p>#1 : TXD_Main #2 : RXD_Main #3 : GND #4 : DC5V #5 : 12V #6 : Fan relay #7 : 4 way relay</p>
---	---	--

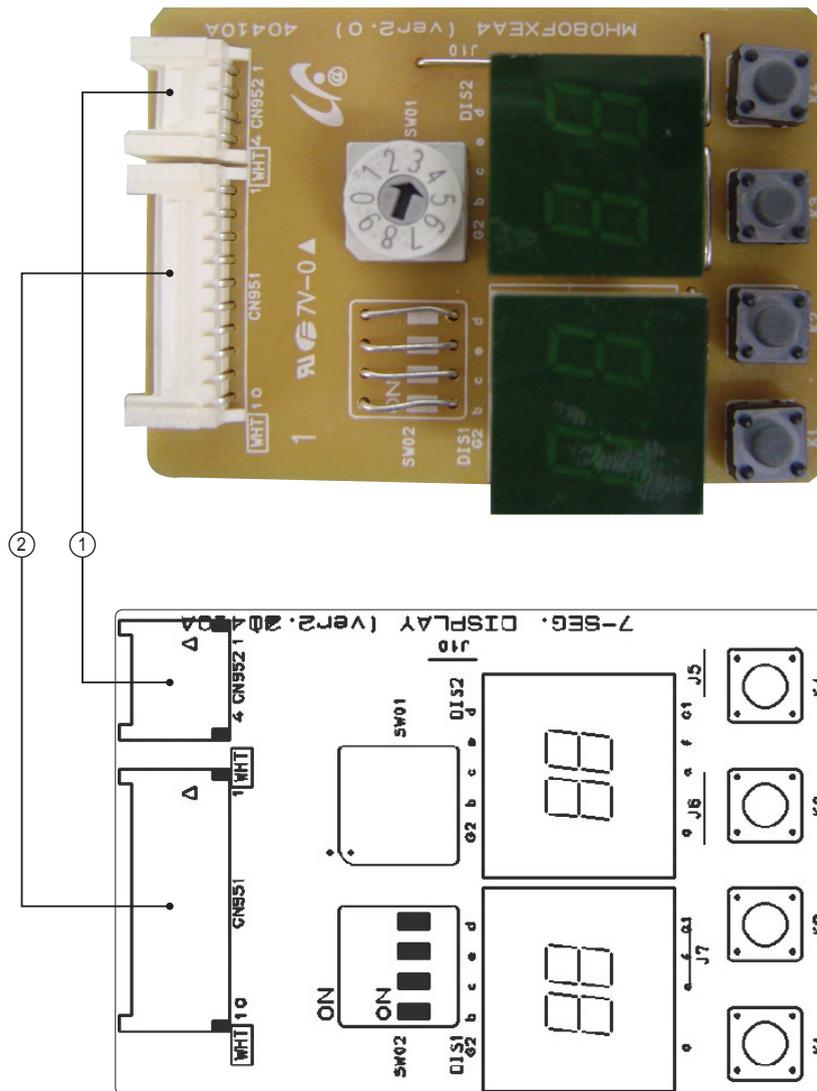

Outdoor Unit (cont.)

■ MAIN PCB

<p>① CN61(5PIN/WHT) : Display #1~2 : Display the operation status on LED #3 : Transmit the S/W inputs to MAIN #4~5 : Transmit signals to the display</p>	<p>② CN51(4PIN/RED) : Temperature Sensor #1 : Transmit detected temperature outside #3 : Transmit detected discharge temperature #2, 4 : GND</p>	<p>③ CN50(4PIN/WHT) : Temperature Sensor #1~2 : Not used #3 : Transmit detected COND temperature #4 : GND</p>
<p>④ CN03(7PIN/WHT) : Inverter PCB #1 : TXD_MAIN #2 : RXD_MAIN #3 : GND #4 : DC5V #5 : 12V #6 : Fan relay #7 : 4 way relay</p>	<p>⑤ CN30(6PIN/WHT) : EEV #1~4 : Teceive EEV motion signal #5~6 : 12V</p>	<p>⑥ CN01(2PIN/BLU) : Transmitter #1 : 12V #2 : GND</p>

6-1-4 Display

<p>① CN952(4PIN/WHT) : Display #1~4 : Receive signals from the Main</p>	<p>② CN951(10PIN/WHT) : Display #1~7 : 7-SEGMENT signal #8~10 : Receive KEY operation signals from the Main</p>
---	--

8. Schematic Diagram

8-1 Indoor Unit

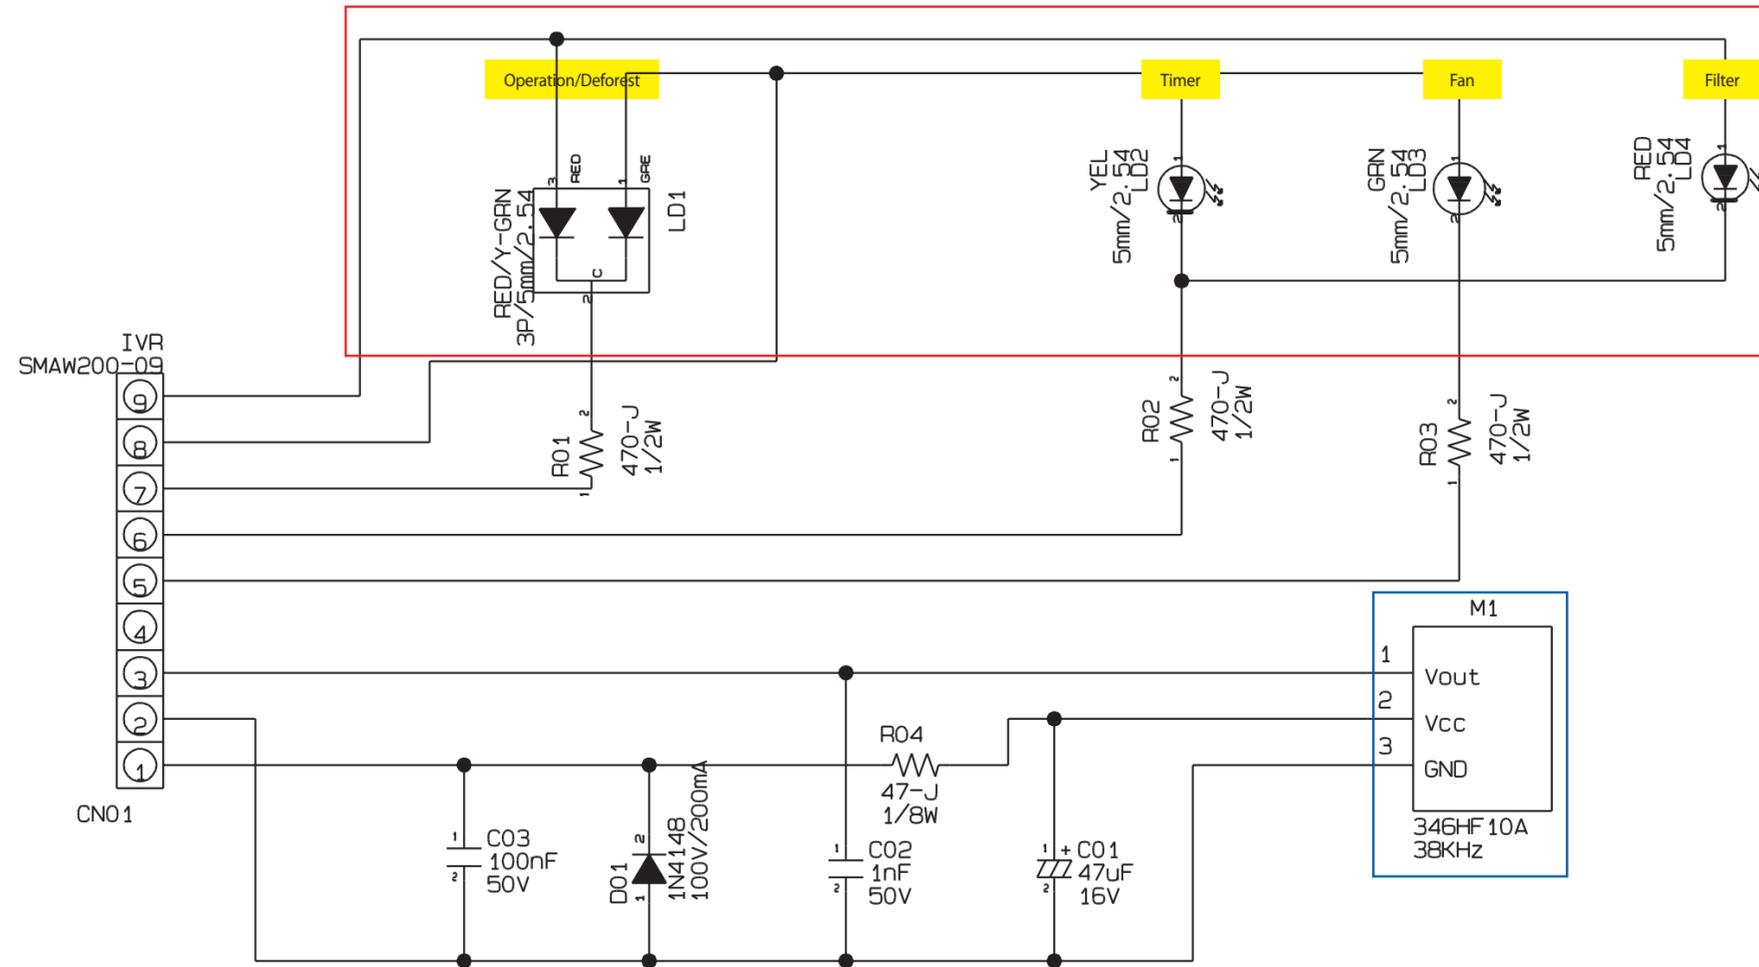

8-1-1 MAIN PCB

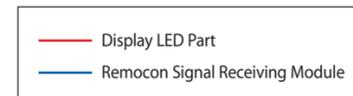

This Document can not be used without Samsung's authorization.

8-1-2 PANEL

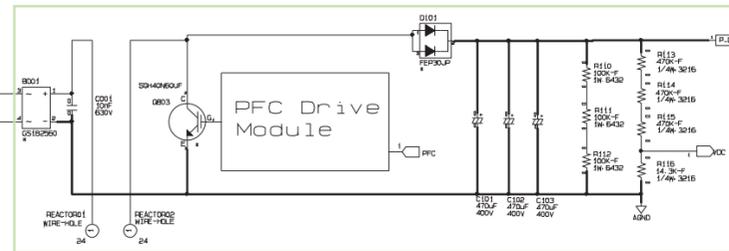

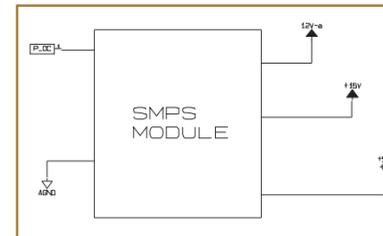

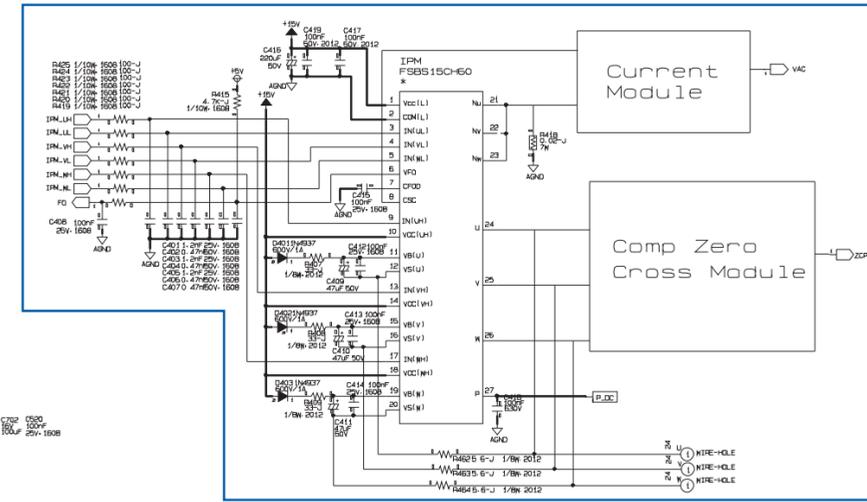

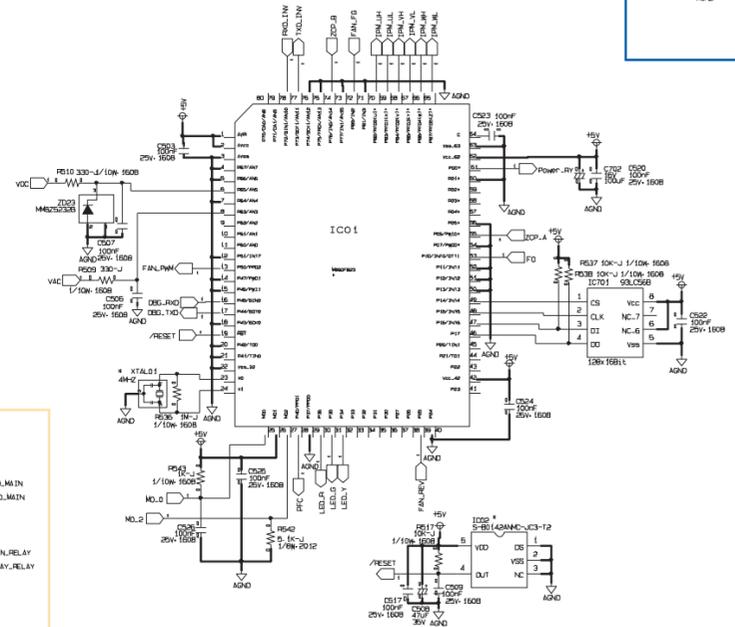

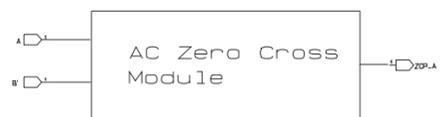

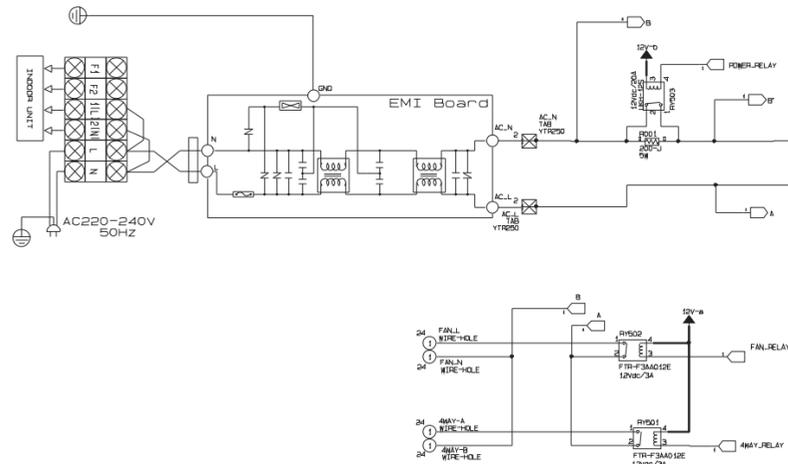

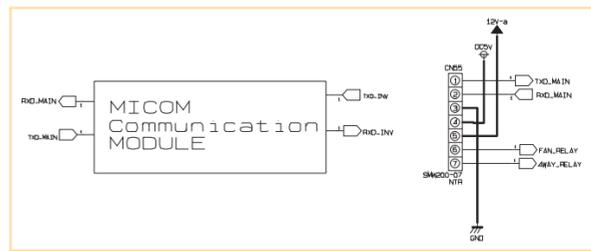

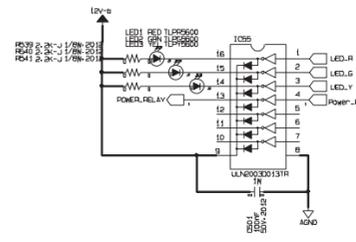

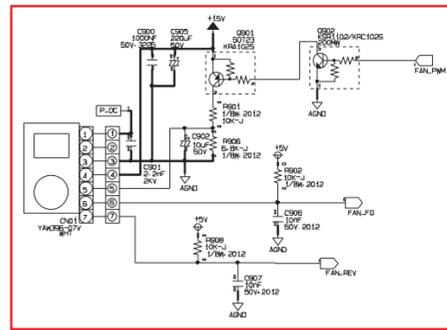

This Document can not be used without Samsung's authorization.

8-2 Outdoor Unit

INVERTER

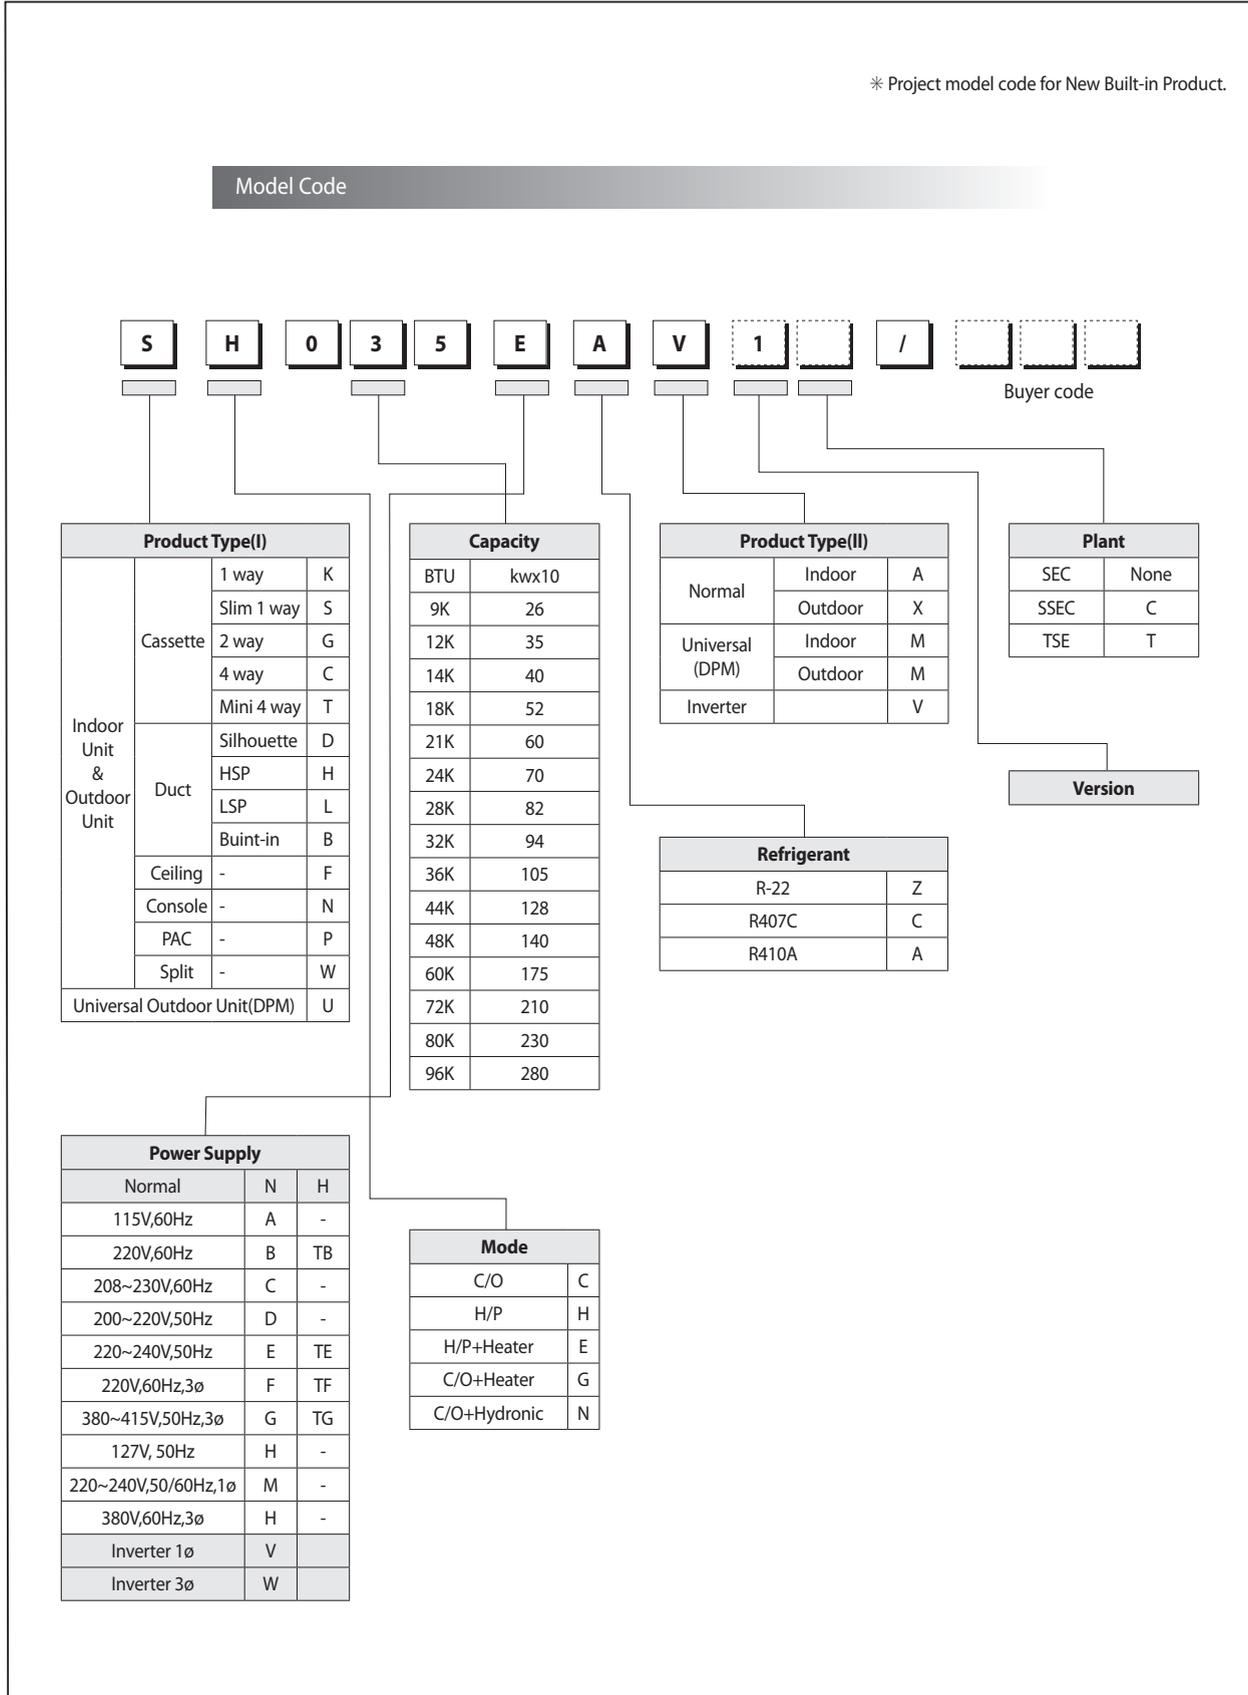

- Fan Motor Drive Unit
- Inverter
- PFC
- SMPS
- Micom Communication

This Document can not be used without Samsung's authorization.

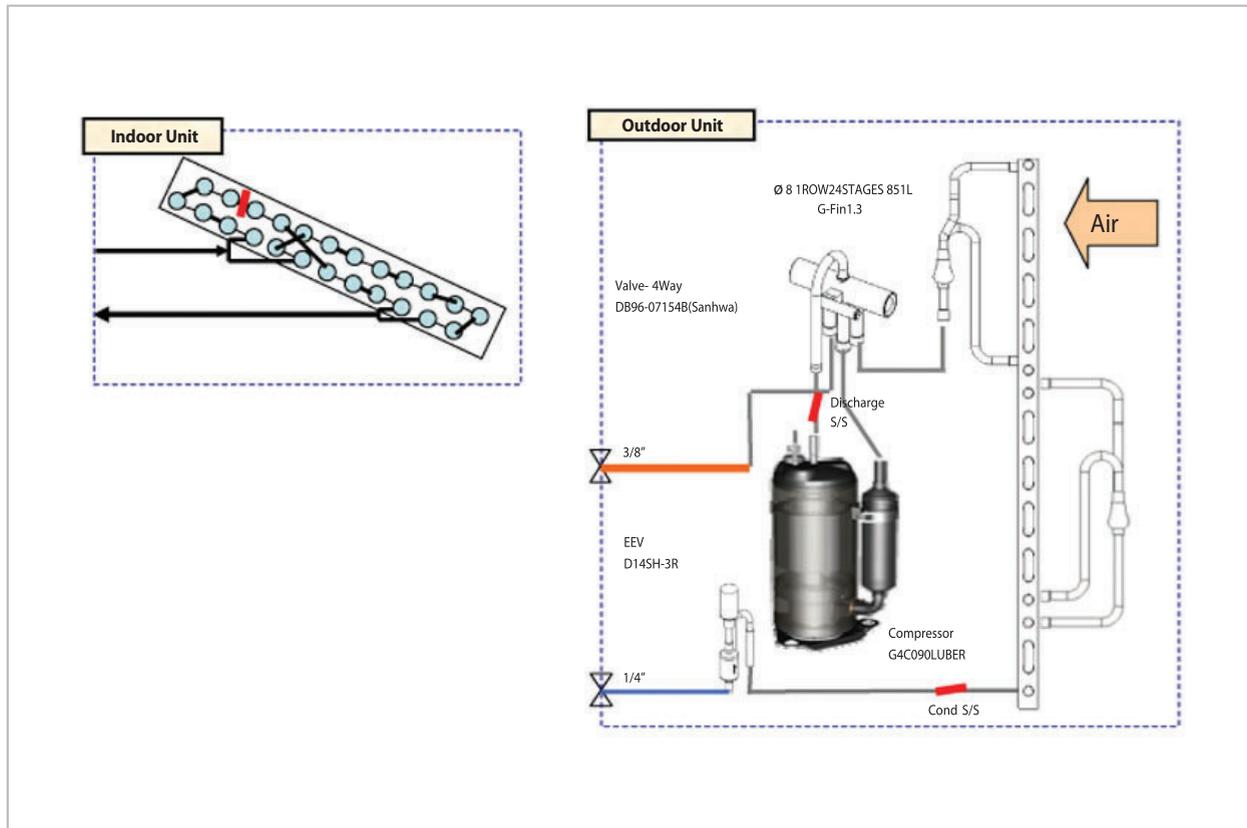

9. Reference Sheet

9-1 Index for Model Name

* Project model code for New Built-in Product.

9-2 Refrigerating Cycle Diagram

- **Condenser**

Gas refrigerant discharged from the compressor is cooled down in the condenser of the outdoor unit by means of thermal emission and turned into a liquid refrigerant before being sent to the evaporator.

- **Compressor**

It compresses the low-temperature, low-pressure refrigerant to let it flow to the Cycle.

- **Evaporator**

As the liquid refrigerant that has been absorbed via capillary tubes evaporates (from liquid to gas), it absorbs heat from the surroundings, thereby cooling the indoor area.

- **Service Valve**

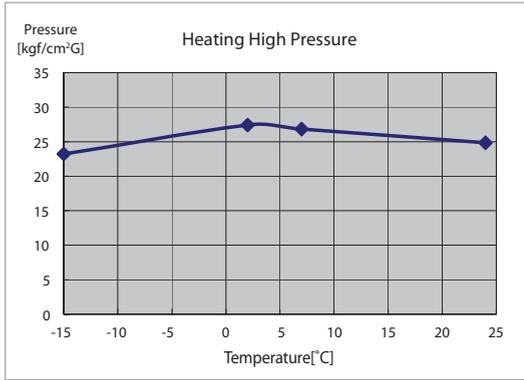

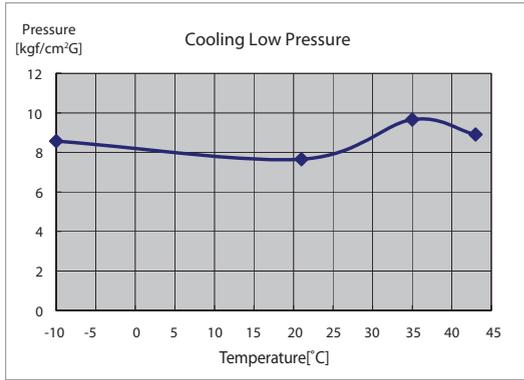

Using a hex wrench, turn the needle valve counterclockwise to open the valve. It is used for vacuuming, gas drain, refrigerant injection, refrigerant purge, and indoor-outdoor units connection.

- **Accumulator**

It prevents liquid refrigerant from flowing into the compressor.
(If liquid refrigerant enters the compressor, it becomes overloaded)

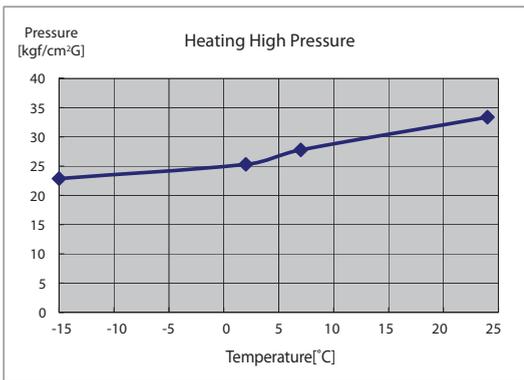

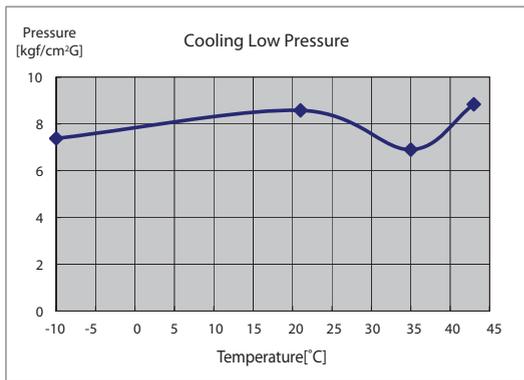

9-3 Pressure Graph

SH026EAV1

	Cooling			
Temperature	-10	21	35	43
Low pressure	8.57	7.65	9.66	8.9
	Heating			
Temperature	-15	2	7	24
High pressure	23.2	27.4	26.84	24.85

SH035EAV1

	Cooling			
Temperature	-10	21	35	43
Low pressure	7.38	8.58	6.9	8.84
	Heating			
Temperature	-15	2	7	24
High pressure	22.86	25.3	27.78	33.37
